The following communication has been received from the delegation of Chile.

I have the honour to refer to recent amendments made to the system governing imports.

Enclosed herewith in duplicate are the pages of the Compendium of Import Rules containing the above-mentioned amendments which should replace the corresponding pages forwarded to the secretariat with Note No. 1915 of 3 September 1980. The amendments are designed to facilitate import trade still further, in that the permitted value for operations effected through the "form for the sale of foreign exchange" system has been increased from US$3,000 to US$10,000.*

The Permanent Delegation of Chile would be glad if the foregoing could be communicated to the Committee on Import Licensing and in addition be taken into consideration for all other purposes and obligations arising out of the General Agreement.

* The Compendium of Import Rules as amended by the changes referred to in this document will be circulated in document LIC/W/6/Add.5.
