UNITED STATES - DEFINITIVE AFFIRMATIVE INJURY DETERMINATIONS CONCERNING CERTAIN CARBON STEEL FLAT PRODUCTS FROM SEVERAL MEMBER STATES OF THE EEC

Request for Consultations with the United States under Article 3 of the Agreement

Communication from the European Communities

The following communication, dated 16 September 1993, as been received from the Permanent Mission of the European Communities.

In accordance with Article 3 of the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade ("the Subsidies Code"), the European Community requests consultations with the United States in respect of the:

Definitive affirmative injury determinations against Belgium, France, Germany, Italy, Spain and the United Kingdom, concerning certain cut-to-length carbon steel plate products, certain hot-rolled carbon steel flat products, certain cold-rolled carbon steel flat products and certain corrosion-resistant carbon steel flat products, published on 10 August 1993.

The Community would like to consult on the finding of the US International Trade Commission that imports of the above-mentioned steel products originating in the Community have caused injury to the US domestic industry.

Since the ITC made one combined injury determination for both the dumping and the subsidy cases, and consultations under the AD Code on these injury findings will take place on 30 September 1993, the Community would like these consultations on injury to be considered as consultations under both Codes.
