The Delegation of the United States wishes to bring to the attention of the Delegation of Canada certain Canadian subsidy programs which operate to increase exports of certain products (automotive parts) from Canada and to reduce imports of certain products (front end wheel loaders and power cruisers)* into Canada. The United States notes that these programs have not been notified by Canada in GATT Documents L/5102/Add.10 and L/5102/Add.10/Suppl.1 which have been submitted under the provisions of Article XVI:1 of the General Agreement.

Pursuant to Article 7:3 of the Subsidies Code, the United States requests that Canada promptly notify its duty remission programs as subsidies operated to increase exports from or reduce imports into its territory.

* The United States reserves the right to request that Canada notify other similar duty remission programs which may be in effect.
