The following notification is being circulated in accordance with Article 10.4.

1. Party and Agency: **NEW ZEALAND**: Standards Association of New Zealand

2. Provision of the Agreement: 2.5.2

3. Product(s) covered, CCCN Heading (National Tariff Heading where applicable): Metering devices for refuelling with compressed natural gas

5. Description: This draft applies to metering methods for measurement or calculation of the volumes of compressed natural gas required to fill a motor vehicle cylinder to the approved maximum working pressure as stated in 6.1 of NZS 5422: Part 2. Two forms of metering are considered:
   (1) chart reading method using metering tables;
   (2) on line metering devices fitted to the fill line measuring the quantity of CNG which has passed through the refuelling line during a specific filling operation.

6. Objective and rationale: To establish an acceptable basis for metering the supply of gas to vehicles.

7. Relevant document(s): DZ 5425: Part 3

8. Where published, when adopted:

9. Final date for submission of comments: 7 August 1981

10. Proposed date of adoption and entry into force: Not known
