5. Title: Standard Radio System Plan (SRSP 312): Technical Requirements for Radio Systems Operating in the 14.5 - 15.35 GHz

6. Description of content:
   (a) The band is subdivided into 5 bands allowing for very high capacity microwave for the multi-channel transmission of video signals; for low capacity transmission of video, data and voice signals; and for temporary radio links carrying video or data signals.
   (b) Frequency planning is such as to allow for flexibility in terms of system band width, one or two-way transmission, and system geometry.
   (c) Considerable latitude is permitted in the application of this standard so as to meet a wide variety of radio applications consistent with ensuring efficient spectrum use and sharing.

7. Objective and rationale: Efficient use and sharing of the spectrum.
