### NOTIFICATION

The following notification is being circulated in accordance with Article 10.4.

1. **Party to Agreement notifying:** UNITED KINGDOM

2. **Agency responsible:** Department of Industry

3. **Notified under Article 2.5.2 [X], 2.6.1 [ ], 7.3.2 [ ], 7.4.1 [ ], Other:**

4. **Products covered (CCCN where applicable, otherwise national tariff heading):**
   Apparatus with one or more particular functions for connection to the British Telecommunications Public Switched Telephone Network.

5. **Title:** Apparatus with one or more particular functions for connection to the British Telecommunications Public Switched Telephone Network.
   - **Part 1. Specification for general requirements.**

6. **Description of content:** The multi-part standard, to which this Part belongs, will set requirements for particular functions and facilities that may be possessed by subscriber's apparatus intended for connection to the British Telecommunications Public Switched Telephone Network.
   The background to the approval arrangements is set out in TBT/Notif.82.98
   - **Objectives and rationale:** The standard sets down certain minimum technical requirements to ensure that type-approved apparatus of the above description will not, if connected to the BT Public Switched Telephone Network: endanger BT personnel or plant; interfere with the service to any BT subscriber other than the one operating the apparatus; expose the user of the apparatus to any likelihood of physical harm arising by virtue of that connection; prevent or hinder compliance with any international obligations to which the United Kingdom or BT are party.

7. **Relevant documents:** As in box 5 above.

8. **Proposed dates of adoption and entry into force:** Adoption: July 1983; Entry into force: January 1984

9. **Final date for comments:** 30 April 1983

10. **Texts available from:** National enquiry point [ ] or address of other body:
    British Standards Institution, 101 Pentonville Road, London N1 9ND
