ANNEX

MINISTRY OF INDUSTRY AND ENERGY

4741 ROYAL DECREE 363/1984, of 22 February, supplementary to R.D. 389/1982, of 15 October, which established technical standards applicable to certain radiators and convector heaters.

R.D. 3089/1982, of 15 October, established technical standards mandatory for fluid-filled radiators and convector heaters to be determined by the Ministry of Industry and Energy and made subject to compulsory approval.

The said standards having been published, at the present time the treatment applicable to imports differs from that applicable to domestic products, and this situation must be corrected.

Accordingly, acting on a proposal by the Minister of Industry and Energy and after consideration by the Council of Ministers at their meeting on 22 February 1984,

I HEREBY DECREE AS FOLLOWS:

Article 1. Fluid-filled radiators and convector heaters intended for the domestic market, whether domestically produced or imported, must correspond to the types already approved, in accordance with the General Operating Regulations of the Ministry of Industry and Energy in the area of standardization, as approved by R.D. 2584/1981 of 18 September, and the technical standards referred to in the Order by that same Ministry dated 10 February 1983.

Article 2. This Royal Decree shall enter into force on the day following its publication in the Official Gazette.

Done at Madrid on 2 February 1984.
