The following notification is being circulated in accordance with Article 10.4.

1. Party to Agreement notifying: **UNITED KINGDOM**

2. Agency responsible: Department of Trade and Industry

3. Notified under Article 2.5.2 [x], 2.6.1 [ ], 7.3.2 [ ], 7.4.1 [ ], Other:

4. Products covered (CCCN where applicable, otherwise national tariff heading):
   Apparatus with call barring facilities (CCCN: 85.13)

5. Title: Apparatus with one or more particular functions for connection to the British Telecommunications Public Switched Telephone Network. Part 7: Specification for apparatus with call barring facilities.

6. Description of content: This Notification should be read in conjunction with Notification TBT/Notif.83.61 relating to Part 1 of the Standard. Part 7 specifies requirements for call barring facilities incorporated in apparatus for connection to a single exchange line of the British Telecommunications public switched telephone network.

7. Objective and rationale: This Standard sets down certain minimum technical requirements to ensure that type-approved apparatus of the above description will not, if connected to the BT public switched telephone network: endanger BT personnel or plant; interfere with the service to any BT subscriber other than the one operating the apparatus; expose the user of the apparatus to any likelihood of physical harm arising by virtue of that connection; prevent or hinder compliance with any international obligations to which the United Kingdom or BT are party.

8. Relevant documents: As in box 5 above

9. Proposed dates of adoption and entry into force:
   - Adoption: June 1985
   - Entry into force: Not yet known

10. Final date for comments: As soon as possible
