The following communication has been received from the delegation of Sweden.

With reference to the decision of the Committee on Customs Valuation at its meeting on 5 May, 1981, concerning data on the application of different valuation methods under the code, I wish to transmit the following report from the Swedish Customs Authorities.

As far as it has been possible to establish on a sampling basis, derogations from article 1 with regard to commercial import do not exceed one per cent. When also gifts etc. in the form of postal parcels are included, the total derogation does not exceed two per cent.

In cases where article 1 has not been applied, article 5 or 7 has been applied. However, it has not been possible to make an estimate on a percentage basis of the use of each of these two articles.
