1. The text of paragraph 2 of Article 10 as revised by Working Party No.1, (Working Party on Preamble to Paragraph 1 and Sub-Paragraph (a) of Paragraph 1 of the new Article 12A proposed by Colombia) was accepted. The following changes have accordingly been made in the text of the Article 10 as contained in document E/CONF.2/C.2 and 6/A/W.2:
   (a) the words "the financing and" have been inserted between the words "advice concerning" and the words "the carrying out";
   (b) the last sentence of the Geneva text of Article 10 has been added to the end of revised text contained in the aforementioned document. This sentence reads: "The Organization shall, upon the same conditions, likewise, aid Members in procuring appropriate technical assistance".

2. The Sub-Committee considered the amendments submitted by Uruguay and Italy to paragraph 1 of Article 11 (page 5 of E/CONF.2/C.2/9). Consideration was given first to the proposal to include manpower among the facilities listed.

   There was discussion as to the additional obligations which would be created by the inclusion of manpower in accordance with the second sentence of paragraph 1 and in accordance with paragraph 2.

   There was agreement that manpower was an essential requirement for economic development, but some Members were uncertain as to the nature of the obligations which might be incurred, and as to whether they could be assumed.

   It was also pointed out that human resources were in rather a different category to the inanimate resources at present listed in the first sentence of Article 11 and that the treatment of nationals was covered specifically in paragraph 69 (c) (i). Moreover, in any case the enumeration of facilities did not aim to be complete.
There was discussion as to whether manpower might not be mentioned in the first sentence of paragraph 1 in such a way as not to create any obligation in accordance with the second sentence of paragraph 1 or in accordance with paragraph 2. However, the sense of the meeting was strongly against the inclusion of any reference to manpower.

3. The Sub-Committee next considered that part of the Uruguayan amendment which proposes that the words "access to international transport facilities" be added to the list of facilities. Reference was made by the Chairman to a new Article 18A proposed by Norway, which was under consideration by Committee III. There was some discussion as to whether transport facilities and not merely international transport facilities and also power facilities should not be included. The sense of the meeting was strongly against the inclusion of the words "access to international transport facilities" in the list of facilities.

4. The Sub-Committee then began consideration of the Chilean amendment to the first sentence of paragraph 1 of Article 11. (Page 5, E/CONF.2/C.2/9).
