The delegation of Brazil proposes the following change in Article 21:

To transfer sub-paragraphs (ii) and (iii) of paragraph 3 (c) to paragraph 2, including them as a new sub-paragraph (c) of paragraph 2, which would read:

"(c) Members undertake:

(i) (identical with paragraph 3 (c) (ii))

(ii) (identical with paragraph 3 (c) (iii))."

As a consequential change, sub-paragraph (c) of paragraph 3 of Article 21 (which is a limitation specifically on domestic policies) would read:

(c) "Members undertake, in carrying out their domestic policies, to pay due regard ... of productive resources".

Justification

Sub-paragraphs (ii) and (iii) of paragraph 3 (c) are limitations on any kind of quantitative restriction irrespective of whether the quantitative restriction is a consequence of the domestic policies referred to in paragraph 3 (c) or of other causes. Consequently these limitations should not be placed in the Charter so as to suggest that they apply only to quantitative restrictions which are the consequence of domestic policies. This might be suggested by the present drafting where these limitations appear as part of a paragraph which begin with a reference to domestic policies.
