The representative of Belgium has asked that the following text be substituted for his statement appearing on page 7 of the English text of document E/CONF.2/C.4/SR.6.

Mr. THILTGES (Belgium) agreed with the representative of Poland. The mandatory clause was included only in paragraph 2. The Committee should make it clear (1) whether optional measures should be taken only when a decision had already been taken by the Organization, or if these complimentary measures could be taken as regards practice, without any prior interference by the Organization and if, in that case, States could do whatever they wished, under the pretext of taking measures against restrictive practices; (2) whether the obligation embodied in paragraph 2, to inform the Organization of the action taken did not imply an intervention a posteriori on the part of the Organization which might, moreover, prove to be most valuable.
