1. In accordance with the decision of Commission B, the delegates of the United Kingdom and the United States, as those mainly interested in Article 49 (N.Y. 58), have met to seek a compromise which would be satisfactory to all countries concerned. The following text is acceptable to both the United Kingdom and the United States delegates, who feel that its most appropriate and logical place in the Chapter would be as a new paragraph (2) of Article 52. It is felt that a general undertaking of this character should naturally apply to all types of inter-governmental commodity agreements.

2. **Article 52**

Suggested new paragraph:

"2. Members, including Members not parties to a particular commodity agreement, shall give favourable consideration to any recommendation made under such agreement for expanding consumption of the commodity in question."

3. The Secretariat will be grateful if all Members of Commission B will inform them in writing before July 5 whether or not this new text, as proposed for inclusion in Article 52, is acceptable to them. If all Members signify their approval, it will be unnecessary to call a further meeting of the Commission to consider this one point.
