On page 4, the fifth paragraph should read as follows:

"With reference to the paragraph "Avoidance of New Tariff or Other Restrictive Measures" on page 49 of the London Report, Mr. Torres (Brazil) suggested that the following underlined words be inserted in the London Report:

'Changes in the form or system of tariffs, or changes in tariffs owing to the depreciation or devaluation of the currency of the country maintaining the tariff as well as the enactment of additional taxes or charges on imports or exports, equivalent to the charges resulting from exchange taxes or multiple currency practices, which do not result in an increase of the protective incidence of the tariff, should not be considered as new tariff increases under that paragraph.'"
