The FAO Observer suggests that the present paragraph 3 of Article 52 become paragraph 4, and a new paragraph 3 reading as follows, be added:

"3. Inter-governmental arrangements with respect to a given primary commodity are necessary to give the producers and governments concerned confidence in carrying forward concerted programmes for the expansion of aggregate world production and consumption of that commodity"; or

"It is believed that some language along this line is necessary if commodity agreements covering price stability, storage stocks, and expanded consumption and nutrition, as recommended in the Report of the FAO Preparatory Commission for World Food Proposals, are to be permitted under the ITO Charter."
