The Czechoslovak delegation proposes the following amendments to Articles 34 - 40:

1. That Article 34, number 1, be amended:

   "Members agree to take appropriate individual and collective legal measures to prevent business practices among commercial enterprises which restrain competition, restrict access to markets or foster monopolistic control in international trade, and which thus have the effect of frustrating the purpose of the Organization to promote expansion of production and trade and the maintenance in all countries of high levels of real income. The term 'commercial enterprises', as used in this Chapter shall mean all persons and entities conducting business, including such entities in which there is a government interest as well as agencies of government conducting trade on commercial principles."

2. That Article 35, number 4, be amended:

   "When it deems that a complaint deserves further examination, request information and data from the Government, in which jurisdiction are the restrictive business practices."

3. That to Article 35, number 7, be added:

   "Prepare and publish reports concerning complaints, findings thereon, recommendations, and actions taken on such recommendations in agreement with the Government in which jurisdiction are such entities."
4. That Article 36, number 1, be amended:

"The Organization is authorized to request information from Members at the request of any Member of the United Nations or specialized agency of the United Nations, relating to business practices which may restrain competition, restrict access to markets or foster monopolistic control in international trade, and, where appropriate, to make recommendations for action by the Members".

5. That to Chapter V be added a new article:

"International Registration of Restrictive Business Practices.

A Register of Restrictive Business Practices shall be established by the Organization.

In order to conduct this register, the Organization is authorized to request information from Members relating to business practices described in article 34, number 2, (a) to (f)".
