Amendment to article 41 proposed by the Norwegian Delegation.

1. In paragraph 1, subparagraph (a) should be inserted a new (i.) with following text:
   "(i) trusts and combinations which substantially control or influence international trade."

2. To paragraph 1 should also be added following new subparagraph (c):
   "(c) from time to time publish the results of the studies."

Remarks:

The main object for the studies that the ITO may conduct should be in the first place the existence, the organization and the activities of the big international trusts and cartels. It is not sufficient that ITO concentrate on the studies mentioned in (i) and (ii) in article 41 paragraph 1 subparagraph (a) in the New York draft. To give the studies the intended effect the results of them should also be published from time to time.
