

22 November 1955

ANNEX BPercentage of liberalized imports from the dollar area of OEEC members which are contracting parties to the General AgreementExplanatory notes

1. These figures represent imports liberalized as of 17 September 1955 as percentages of each country's total private imports from the United States and Canada on the basis of actual imports in 1953.
2. Although the percentages are calculated on the basis of imports from the United States and Canada, the liberalization is applied by most OEEC countries to all other countries in the dollar area. The lists of countries belonging to the dollar area used, are, however, not identical for all OEEC countries.
3. The figures are percentages of imports in 1953, and therefore should not be taken as an indication of the proportion of imports that would be coming into these countries from the United States and Canada in the absence of all restrictions.

Country	Category of Imports			Total
	Cat. I	Cat. II	Cat. III	
Austria	3	17	11	8
Benelux	88	81	89	87
Denmark	44	42	29	38*
Germany	77	62	78	68
Greece	100	100	97	99
Italy	2	41	6	24
Sweden	71	49	60	58
United Kingdom	73	69	5	56

* This percentage has since been increased to 55. Figures for the individual categories are not yet available.
