Working Group on Adjustment Assistance Measures  
Technical Sub-Group

## INFORMATION ON PRODUCTION, TRADE AND ADJUSTMENTS IN THE TEXTILES SECTOR

Replies Received from Delegations to  
Airgrams GATT/AIR/1611 and 1612

### Addendum

Attached is the reply received to the above-mentioned airgrams from Colombia.

REPLIES TO THE REQUEST FOR INFORMATION  
IN AIRGRAM GATT/AIR/1612

I. STATE OF THE INDUSTRY

1. General information concerning Colombia's textile industry

Up to 1960, the textile industry headed the list of Colombia's industries in the generation of value added. Thereafter, the textile industry moved to second place in the generation of industrial value added, but holds first place in volume of employment generated. In 1977, the textile industry accounted for 16.3 per cent of the total employment, 12.5 per cent of the gross production, and 14 per cent of the total value added, of the manufacturing sector.

The most important branch of the textile industry is cotton woven goods and manufactures, which includes the production of cotton fabrics, cotton printed fabrics, polyester fabrics and other manufactures using cotton. This branch accounts for 52 per cent of the gross value added, 40 per cent of the jobs and 38 per cent of the investments of the textile industry. Next in importance come knitted goods, and the spinning, weaving and finishing of textiles, which includes three activities: ginning and preparation of cotton, spinning and, manufacture of narrow fabrics.

2. Employment

The number of workers employed in the textile industry increased by 12.7 per cent during the period 1970-74. In 1977, the labour employed in the textile industry was 3 per cent less than in 1970.

3. Prices

The annual average price index for the textile sector has risen more slowly than that for trade in general. Between 1974 and 1978, the average annual increase in the general price index was

23.1 per cent and the inflation rate for workers-consumers was 23.6 per cent, whereas the price index for the textile sector rose by 14.6 per cent.

4. Foreign trade

Between 1976 and 1979, the value of Colombian exports of textiles and clothing increased by 34 per cent, from US\$226 million to US\$303 million. During the same period, imports of textiles covered by the MFA rose by 165 per cent, from US\$49.8 million to US\$132 million. Over the same period, imports of textile machinery increased from US\$38.2 million to US\$83 million. The textile sector thus showed a positive balance of US\$176 million in 1976, and US\$171 million in 1979, so that the surplus remained relatively static. If imports of machinery for the textile sector are taken into account, the surplus amounts to only US\$138 million in 1976, and US\$87.7 million in 1979. In other words, in 1979, imports of machinery for the textile sector absorbed more than half of this surplus.

Textile imports into Colombia have been considerably liberalized since the mid-1970s. Prohibition of certain textile imports has been abolished. At the present time, 87 groups of products can be imported under the régime of free imporation.

This liberalization effort of the Government of Colombia is in contrast to the quantitative restrictions and other trade barriers being applied to Colombian textile exports by importing countries.

SIZE OF COLOMBIA'S TEXTILE INDUSTRY IN COMPARISON

1/ 132 headings were liberalized in 1977.

45 items were shifted to the "Prior" regime at the end of 1979.

87 headings remained under the free import regime.

The 132 free regime headings are included in the above date.
