

GENERAL AGREEMENT ON
TARIFFS AND TRADE

RESTRICTED

Spec(83)10
14 February 1983

REVISED SUPPLEMENTARY 1983 BUDGET ESTIMATES

Note by the Director-General

1. The Committee on Budget, Finance and Administration at its meeting on 9 December 1982 discussed the Supplementary Budget Estimates for the Financial Year 1983 to meet Additional Requirements arising from Ministerial Decisions. In the light of the comments and suggestions made, the Director-General now puts forward revised expenditure estimates totalling SwF 1,078,000.
2. The additional workload resulting from the decisions taken at the Ministerial meeting will be met, to the greatest possible extent, by the redeployment of existing resources. This is in accordance with the normal practice of the secretariat. Only where it would be impossible to carry out Ministerial decisions faithfully without some reinforcement have proposals for additional staff or funds been made. It should therefore be borne in mind that the proposals contained in the supplementary estimates by no means reflect the totality of the work flowing from the Ministerial Meeting: a great part of it will be carried out by the existing staff.
3. The Committee noted that implementation of CONTRACTING PARTIES' decisions is likely to commence at different points of time in 1983. If it proves necessary, on the basis of experience acquired in 1983, further provision of temporary assistance will be requested in the 1984 budget.
4. In view of the difficulty of evaluation in advance of the exact impact in terms of workload of the decisions taken by the Ministers, the Director-General intends, in the interest of overall economy, to retain the fullest flexibility in the application of additional resources in order to be able to make the most rational and efficacious use of them.
5. In the light of the comments made by the Committee, it is now proposed that all such additional staff be recruited on a temporary assistance basis rather than against permanent posts. Experience will show how far the need for these posts is in fact permanent and, if it proves to be so, proposals for their consolidation into the permanent establishment will be made.
6. Furthermore, in the light of the discussion in the Committee and upon serious reconsideration of the initial proposals set out in document L/5428 some of the proposed expenditures can be withdrawn at this stage. These are the following:

	<u>Swiss francs</u>
1. The post of Senior Legal Officer P5/D1	116,000
2. the post of a statistical clerk for work on the liberalization of trade in tropical products	36,000
3. outside expert assistance for technical co-operation	140,000
4. a reduction of 50 per cent has been made in respect of the additional cost (subsistence and travel) of increasing the participation in GATT Commercial Policy Training Courses because, at this stage, an increase in the number of participants can be foreseen only with effect from the second course in 1983	<u>70,000</u> 362,000 =====
7. The revised estimates, with supplementary notes which take account of questions raised and comments made by members of the Committee on Budget, Finance and Administration, are as follows:	

Non-Tariff Measures Division

The CONTRACTING PARTIES decided on the creation of a group for the purpose of reviewing quantitative restrictions and other non-tariff measures, so as to achieve the elimination of restrictions which are not in conformity with the General Agreement, or their being brought into conformity with the Agreement, as well as achieving progress in liberalizing other quantitative restrictions and non-tariff measures. The group is to make a complete report containing its findings and conclusions to the CONTRACTING PARTIES at their 1984 Session. While the previous group dealing with quantitative restrictions has been dormant for some time, the Division has, as was explained to the Committee, taken up a number of other responsibilities. Nevertheless, part of the anticipated additional workload can be carried out within the existing staff resources although, as the Division is not heavily staffed, it is evident that, for the addressing inter alia

Swiss francs

of some 500 items listed in the inventory of quantitative restrictions, an additional professional officer with considerable experience in this field is necessary.

Professional assistance - 240 man/days

84,000

Development Division

The CONTRACTING PARTIES instructed the Committee on Trade and Development to consult on a regular basis with contracting parties individually or collectively, as appropriate, to examine how individual contracting parties have responded to the requirements of Part IV. In this connexion the CONTRACTING PARTIES decided that the Committee on Trade and Development would adopt a programme of consultations and that each such consultation would be based on information supplied by the contracting party in question and additional factual material prepared by the secretariat. The CONTRACTING PARTIES at the same time instructed the Committee on Trade and Development to carry out an examination of the prospects for increasing trade between developed and developing countries.

The present staff of the Division has been coping with a very heavy workload and the preparation of information and studies relating to the new tasks cannot be carried out without some strengthening of present resources. This at the minimum would involve:

Professional assistance - 240 man/days

69,000

Statistical clerk - 240 man/days

36,000

105,000

Technical Co-operation

The CONTRACTING PARTIES took a decision to strengthen the technical co-operation programme of GATT by responding to increasing requests for seminars and other technical assistance activities. The Technical Co-operation Division is responsible for the implementation of the technical assistance programme. Preferential help is given to the least-developed countries,

Swiss francs

not necessarily members of GATT, but those most interested in GATT and its activities, and in this connexion the language element is often of crucial importance. The Division, which deals with general matters, draws on officers from the operational divisions in order to make use of their expertise and experience with regard to specific, technical questions. In 1982 nearly 80 per cent of the missions were carried out by officers from operational divisions:

a) It is accordingly proposed that in order to make the most effective response to the CONTRACTING PARTIES's decision, two professional officers be recruited in connexion with the decision to strengthen the technical assistance facilities of the secretariat. These officers would be placed in operational divisions and would increase the capacity of the divisions to make more experienced staff members available for advisory missions. The staff resources of the Technical Co-operation Division itself would not be enlarged, except as mentioned under (b) below.

Economic Affairs Officer P3/Counsellor P4	84,000	
Economic Affairs Officer P3/Counsellor P4	<u>84,000</u>	168,000

b) The number of technical co-operation missions carried out in 1982 amounts to fourteen at a cost of some SwF 150,000. The increased cost of a similar number of missions in 1983, taking into account higher travel rates, will be approximately SwF 175,000 and a provision of this magnitude has been approved in the 1983 budget. At this point of time, preliminary and firm requests for fourteen missions to be carried out in 1983 have already been received, and on the basis of recent experience it is anticipated that further requests will bring the total for 1983 to at least twenty missions. Travel costs of SwF 75,000 have therefore been foreseen to cover up to six additional missions (see under Miscellaneous Expenditure below). Furthermore, additional secretarial assistance for the preparation of the increased number of

Swiss francs

missions and other technical assistance activities will have to be provided.

Secretary G3

34,000 202,000

Economic Research and Analysis Unit

The CONTRACTING PARTIES decided to carry out on a priority basis a study on textiles which requires, inter alia, a detailed review of existing systems of restraints and restrictions on textiles and their implications for the trade and economic situation of countries in international trade. The study should be completed for consideration by the CONTRACTING PARTIES at their 1984 Session.

This major study, given its scope, will involve several sections within the secretariat but it will be conducted under the overall responsibility of the Economic Research and Analysis Unit. While initially a large part of the study can be handled with the existing resources of the secretariat, it is also clear already that, as from the initial stage, outside professional expertise will be necessary to supplement regular resources.

Professional assistance - 180 man/days

58,000

The CONTRACTING PARTIES also decided that problems relating to trade in non-ferrous metals and minerals, forestry products, as well as fish and fishery products should be examined. The bulk of the work in preparation for the examinations can be carried out with existing staff resources by the redeployment of these resources and the reallocation of tasks. It is also clear, however, that at the very least, additional statistical work will be generated in 1983 for which temporary assistance is necessary.

Clerical services - 180 man/days

30,000 88,000

Agriculture Division

The CONTRACTING PARTIES decided that a major two-year work programme be undertaken for the

examination of a number of matters enumerated and specified in their decision. For the purpose of carrying out this work, an improved and unified system of notifications is to be introduced and a Committee on Trade in Agriculture is to be established. The Committee is to make appropriate recommendations to the Council and the CONTRACTING PARTIES for their consideration not later than at their 1984 Session.

As a result of redeployment which has already taken place, the Agriculture Division, in spite of its very greatly increased workload, will be able to deal with a large part of the work accruing from the formation of the Committee. However, it is now clearly essential that an additional professional officer with great experience in the field of trade in agriculture and at an adequate level for dealing with government representatives, etc. be provided for the servicing of the Committee on Trade in Agriculture.

Counsellor P4/P5

100,000

Other activities

As a result of the Ministerial Decisions various other activities will be undertaken which will involve a great deal of preparatory work for the secretariat. While in the first instance, any such preparatory work will be carried out with existing resources, it is also apparent that some temporary reinforcement will be necessary for an adequate performance of this work.

Consultants - 180 man/days

60,000

Professional assistance - 180 man/days

45,000

105,000

Swiss francs

Training activities

The CONTRACTING PARTIES decided to permit an increased participation in the GATT Commercial Policy Training Courses. Within the present facilities in the secretariat it is only possible to provide for an increase in the number of participants in the courses from twenty to twenty-four, as an absolute maximum. This situation can only be reviewed in the light of expanded facilities which are unlikely to materialize for some four to five years. An increase by four in the number of participants for two courses a year would require -

Subsistence	85,000
Travel	<u>55,000</u>
	140,000

As in the meantime preparations for the first course in 1983 are too far advanced to benefit from any supplementary budget appropriations, an increase in participation can only be foreseen to begin as of the second course in 1983 -

Subsistence	42,500 .	
Travel	<u>27,500</u> .	70,000

The CONTRACTING PARTIES decided on the inclusion in the training programme of a regular course in the Spanish language. Arrangements will be made to have a course in Spanish once every three years, the first course to be held in February-June 1984. This way of proceeding is in line with the average number of applications being received from countries with a predominantly English, French or Spanish working language and in no way reduces the number of potential participants in the other courses.

One indispensable requirement for the inclusion in the training programmes of a regular Spanish-language course is a Spanish mother tongue officer, fluent also in English and French, as well as a bilingual secretary of Spanish mother tongue, to attend to the diversity of tasks which are involved in being a tutor to the trainees, particularly in the writing of studies and in the preparation of papers for seminars, etc. Obviously this officer will be fully engaged in the other courses where additional work will arise from the increase in participation.
