AGRICULTURE DOCUMENTATION
INVENTORY OF NON-TARIFF MEASURES

Licensing, Import Restrictions and
State-Trading Régimes in Respect
of Products in CCCN Chapters 1-24

Applied by:
FINLAND

This document is one in a series which updates the information originally circulated in the MTN/3E/DOC/7 and Addenda series, for those countries with which consultations had been held in the Joint Working Group on Import Restrictions (JWG).

At the time of these consultations, Finland's import restrictions were applied for balance-of-payments reasons under the provisions of Article XII and were thus subject to the regular consultation procedure in the Committee on Balance-of-Payments Restrictions. Finland's import restrictions for agricultural products were therefore recorded, for purposes of the NTM Inventory, in document MTN/3E/DOC/8/Add.6.

Following the disinvocation of Article XII effective 26 April 1979 (L/4801), Finland's remaining import restrictions are now presented in the format originally established for recording restrictions and related measures in respect of countries covered by the JWG. The indications listed in column 3 of the format "Countries indicating an interest" correspond to those shown in paragraph 2 of MTN/3E/DOC/8/Add.6 of December 1974.

For NTM's other than those covered by this document please refer to document AG/DOC/1 which provides an overview of the way in which NTM information is organized within the AG/DOC/-series.

L/5130 of 6 April 1981 - Finland's reply to the questionnaire on import licensing procedures.

L/5104/Add.9 of 29 June 1981 - Finland's notification pursuant to Article XVII:4(a) - (State trading).
In connection with the updating of document MTN/3E/Doc/8/Add.6, the Finnish authorities have submitted the following general statement.

Finland is faced with structural difficulties in agriculture, which are particularly pronounced since the agricultural labour force is still large compared with other western and northern European countries. The national food security requires a reasonable rate of self-sufficiency in basic food commodities, which are produced in relatively unfavourable climatic and geographical conditions. This requires a certain degree of import protection. Also the very important aspects of regional and employment policies concerning northern and eastern Finland must be taken into account in the national agricultural policy.

Within the framework of the GATT, Finland has, however, during the last few years reduced or eliminated import restrictions on many agricultural commodities, especially tropical products of export interest to developing countries.

The main objective of the agricultural production policy, at present, is an attainment of a better balance between agricultural production and domestic consumption. In the last few years the production of dairy products, eggs and meat has in particular exceeded domestic consumption. The Finnish Government has therefore taken several strict measures to curb domestic farm production.

Restrictions on imports of certain agricultural commodities have therefore to be maintained in order not to upset market conditions or to increase difficulties relating to unemployment.

Beer made from malt (22.03)

Country or group maintaining measures:
Finland

Countries indicating an interest:
EEC
United States

(a) Description:
State trading

(b) Comments by other countries:

(c) Comments by country maintaining the measures:

Since 1932 the Alcohol Monopoly (Oy Alko Ab) has, with some modifications, the sole right to produce, import and sell alcoholic beverages in Finland in order to curb excessive consumption. In its pricing and purchasing policy foreign and domestic production are treated in a non-discriminatory way. Purchases are made in accordance with commercial considerations. The value of total alcohol imports was FIM 78 million in 1981. Alcoholic beverages were imported from thirty-two countries.

Malt beverages are brewed in private breweries. Prices are determined and sales controlled by Alko. Imports and exports of such beverages are made by these breweries under the supervision of Alko. Other domestic alcoholic beverages are produced by certain enterprises on the same conditions as for malt beverages. Also the production, use, import and export of beverages containing more than 2.25 per cent ethyl alcohol are supervised by Alko.
