SBMI-ANNUAL REPORT OF ANTI-DUMPING ACTIONS

for the period July 1, 1989 to December 31, 1989

COUNTRY	PRODUCT	DATE OF INITIATION ¹	FINAL MEASURES			NO FINAL MEASURES				TRADE VOLUME ⁵	DUMPED IMPORTS AS % OF DOMESTIC CONSUMPTION	% OF TRADE VOLUME INVESTIGATED (OF THE EXPORTING COUNTRY)	BASIS FOR DETERMINATION
			PROVISIONAL MEASURE ²	DEFINITIVE DUTY ³	PRICE UNDERTAKING ⁴	NO DUMPING	NO INJURY	CASE WITHDRAWN	OTHER				
1	2	3	4	5	6	7	8	9	10	11	12	13	14
United States (cont.)	Tile Backer Board	02.10.89 (R) (undertaking)											
	Transit Concrete Mixers	04.08.89			31.10.89 12 %					80 units	11%	100%	CV
Yugoslavia	Women's Leather Boots	25.08.89								42,660 pairs (8 months)			

- 1 - The symbol (R) is used if an investigation is opened in the context of a review of an existing anti-dumping measure, or after an allegation of a breach of an undertaking. Where the word "undertaking" appears, this indicates that a review of the injury question has been initiated.
- 2 - Provisional measures apply from the date a preliminary determination of dumping is made up to the conclusion of the Canadian International Trade Tribunal's inquiry regarding injury caused to Canadian producers of like goods (maximum 120 days from the preliminary determination date). The percentage represents the estimated margin of dumping calculated as a percentage of normal value.
- 3 - Either the date of a positive injury finding, in a case of an investigation, or the date of the conclusion of a review of normal values and export prices in cases where there is an existing Tribunal finding of injury.
- 4 - The word "Renewal" indicates that an existing undertaking was renewed following a review of the injury question; the word "Amendment" indicates that a technical amendment was made to the undertaking, normally to account for changes in the price or terms contained therein.
- 5 - The trade volume is based on statistical data for the latest available 12-month period prior to initiation, unless it is otherwise specified.
- 6 - The results of the investigation indicated that the margins of dumping of the subject goods were declining throughout the period under investigation. The investigation was terminated on the basis that the actual or potential volume of dumped goods was negligible.

Basis for determination codes:

- HM - home market price
- TM - third country market price (specify country)
- CV - constructed value
- SP - prices charged by same producer
- OP - prices charged by other producer
- OPT - prices charged by other producer in third country
- OCT - costs of other producer in third country
- O - other (specify)
- O-BIA - other - best information available
- LDS - treatment having regard to Article 13 of the Agreement and the Decisions of the Committee, document ADP/2 (also in column 3 where applicable)

Where an investigation is conducted in the context of a review of an existing anti-dumping measure, the date of completion of the review is shown in column 5, but generally it is not possible to state the margin of dumping in this column. This is because the review procedure was initiated to allow Canadian authorities to determine the current normal value of the imported product, in order to determine, in the future, whether imports of the product are dumped. As the margin of dumping is equal to the difference between the export price and the normal value, it is impossible to determine, a priori, the percentage margin of dumping. In addition, Canadian authorities compile statistical data concerning trade volume of the imported product only when reviewing a determination of injury in the context of possible revocation of the anti-dumping measure. As a result, statistical data on trade volume for columns 11, 12 and 13 is not available for certain investigations of existing anti-dumping measures.
