^{1/} The symbol (R) is used if an investigation is opened in the context of a review of an existing anti-dumping measure.

^{2/} Provisional measures apply from the date a preliminary determination of dumping is made up to the conclusion of the Canadian International Trade Tribunal's enquiry regarding injury caused to Canadian producers of like goods (maximum 120 days from the preliminary determination date). The percentage represents the estimated margin of dumping of the dumped imports calculated as a percentage of normal value.

^{3/} Either the date of a positive injury finding, in a case of an investigation, or the date of the conclusion of a review of normal values and export prices in cases where there is an existing Tribunal finding of injury.

^{4/} The word "Renewal" indicates that an existing undertaking was renewed following a review of the injury question; the word "Amendment" indicates that a technical amendment was made to the undertaking, normally to account for changes in the price or terms contained therein.

^{5/} The trade volume is based on statistical data for the latest available 12-month period prior to initiation, unless it is otherwise specified.

^{6/} On 29 January 1988, the Deputy Minister of National Revenue (Customs & Excise) accepted undertakings from exporters located in Brazil, Luxembourg and Yugoslavia. Undertakings from exporters located in these countries accounted for all or almost all shipments of the subject goods. Therefore, the investigation was suspended for these three countries, as well as Turkey and Poland. As a result of violations to undertakings by two Brazilian exporters, the Deputy Minister terminated all undertaking agreements with respect to the three countries, and made a preliminary determination of dumping with respect to the subject goods originating in or exported from Brazil, Luxembourg, Poland, Turkey and Yugoslavia.

^{7/} No Swedish exporter of the subject goods identified during the review.

^{8/} Based on information published by the Washington State Clearing House and on information submitted by or on behalf of Washington State Apple growers and packing plants.

N/A - non-applicable

CONF - information provided to the authorities on a confidential basis or calculation would disclose information provided on a confidential basis.

Basis for determination codes:

HM - Home market price
TM - Third country market price (specify country)
CV - Constructed value
SP - Prices charged by same producer
OP - Prices charged by other producer

OPT - Prices charged by other producer in third country
OCT - Costs of other producer in third country
O - Other (specify)
O-BIA - other - best information available
LDC - treatment having regard to Article 13 of the Agreement and the Decisions of the Committee, document ADP/2 (also in column 3 where applicable)

NOTE TO THE SEMI-ANNUAL REPORT SUBMITTED BY CANADA
UNDER ARTICLE 14:4 OF THE AGREEMENT

Where an investigation is conducted in the context of a review of an existing anti-dumping measure, the date of completion of the review is shown in column 5, but generally it is not possible to state the margin of dumping in this column. This is because the review procedure was initiated to allow Canadian authorities to determine the current normal value of the imported product, in order to determine, in the future, whether imports of the product are dumped. As the margin of dumping is equal to the difference between the export price and the normal value, it is impossible to determine, a priori, the percentage margin of dumping. In addition, Canadian authorities compile statistical data concerning trade volume of the imported product only when reviewing a determination of injury in the context of possible revocation of the anti-dumping measure. As a result, statistical data on trade volume for columns 11, 12 and 13 are not available for certain investigations of existing anti-dumping measures.
