¹The symbol (R) is used if an investigation is opened in the context of a review of an existing anti-dumping measure.

²Provisional measures apply from the date a preliminary determination of dumping is made up to the conclusion of the Canadian International Trade Tribunal's enquiry regarding injury caused to Canadian producers of like goods (maximum 120 days from the preliminary determination date). The percentage represents the estimated margin of dumping of the dumped imports calculated as a percentage of normal value.

³ Either the date of a positive injury finding, in a case of an investigation, or the date of the conclusion of a review of normal values and export prices in cases where there is an existing Tribunal finding of injury.

⁴ The word "Renewal" indicates that an existing undertaking was renewed following a review of the injury question; the word "Amendment" indicates that a technical amendment was made to the undertaking, normally to account for changes in the price or terms contained therein.

⁵ The trade volume is based on statistical data for the latest available 12-month period prior to initiation, unless it is otherwise specified.

⁶ The trade volume for the hot-rolled, heat-treated carbon steel plate investigation is based on import information available to Revenue Canada for the period 01.10.91 to 30.06.92 except for the United States where the period was 01.01.92 to 30.06.92. The longer period was used for countries other than the United States due to their less frequent importation patterns. Note that the reported tonnage for heat treated steel plate includes both heat-treated and non-heat-treated plate due to misclassification by importers.

⁷ The reinvestigation of women's boots and shoes from Brazil and Taiwan involves exporters identified subsequent to the last review and low volume exporters (less than 2,000 pairs per year).

⁸ The trade volume for the cold-rolled carbon steel sheet investigation is based on import information available to Revenue Canada for the period 01.10.91 to 30.06.92.

⁹ The trade volume for the hanging file folders investigation is based on import information available to Revenue Canada for the period 01.10.91 to 30.06.92.

¹⁰ The Deputy Minister of National Revenue (Customs and Excise) allowed the undertaking to expire on 12.10.92 on the basis that it was no longer required to remedy the injury. Case terminated.

¹¹ Cases involving Yugoslavia refer to exports from what is now the Republic of Slovenia and the former Yugoslav Republic of Macedonia.

CV	- construed value	O	- other (specify)
SP	- prices charged by same producer	O-BIA	- other - best information available
OP	- prices charged by other producer	LDC	- treatment having regard to Article 13 of the Agreement and the Decisions of the Committee. document ADP/2 (also in column 3 where applicable)

Note to the Semi-Annual Report Submitted by Canada
under Article 14:4 of the Agreement

Where an investigation is conducted in the context of a review of an existing anti-dumping measure, the date of completion of the review is shown in column 5, but generally it is not possible to state the margin of dumping in this column. This is because the review procedure was initiated to allow Canadian authorities to determine the current normal value of the imported product, in order to determine, in the future, whether imports of the product are dumped. As the margin of dumping is equal to the difference between the export price and the normal value, it is impossible to determine, a priori, the percentage margin of dumping. In addition, Canadian authorities compile statistical data concerning trade volume of the imported product only when reviewing a determination of injury in the context of possible revocation of the anti-dumping measure. As a result, statistical data on trade volume for columns 11, 12 and 13 are not available for certain investigations of existing anti-dumping measures.
