TECHNICAL SUB-COMMITTEE

Proposal by Canada

The following communication, dated 8 April 1980, has been received from the Permanent Mission of Canada.

Pursuant to GATT document AIR/W/1, Canada does not have questions to raise at this time concerning product coverage, end-use systems, customs duties or other charges, or aircraft tariff nomenclature as they apply between signatories of the Agreement on Trade in Civil Aircraft.

With respect to the proposed modification of product coverage under the Agreement, we have identified a number of products which, it would appear, are not covered, in whole or in part, by the Agreement and which are being put forward for consideration by the Technical Sub-Committee. It should be noted that this does not constitute a negotiating list.
