ACUERDO GENERAL SOBRE ARANÇELES ADUANEROS Y COMERCIO

Acuerdo Internacional de los Productos Lácteos

COMITE DEL PROTOCOLO RELATIVO A DETERMINADOS QUESOS

Cuadros recapitulativos

Revisión

De conformidad con la regla 28 del reglamento, la Secretaría ha elaborado los cuadros recapitulativos adjuntos, en los que se recogen los datos facilitados en el cuadro A del cuestionario 3, relativo a los quesos. Figura igualmente un cuadro de las exportaciones de queso, por destinos.
Signos convencionales

En los cuadros estadísticos se han utilizado los signos que se indican a continuación:

... falta el dato
- cantidad nula o insignificante
( ) cifra provisional sujeta a revisión

NOTAS

En los cuadros estadísticos únicamente figuran los datos que se han proporcionado a la Secretaría en respuesta a los cuestionarios relativos a los productos comprendidos en los protocolos.

Como las cifras han sido redondeadas, cabe la posibilidad de que los totales anuales no correspondan exactamente a la suma de las cifras trimestrales. Además, cuando se han revisado los totales anuales y no los datos trimestrales, pueden observarse diferencias de mayor magnitud. En estos casos, los datos figuran entre paréntesis.

La definición de las existencias puede variar según los países o grupos de países considerados. Siempre que ha resultado hacedero, se ha precisado la definición en los cuadros donde era pertinente.

Los datos que figuran en los cuadros relativos al consumo corresponden al consumo aparente, o sea, las existencias al comienzo del periodo, más la producción, más las importaciones totales, menos las exportaciones totales, más las existencias al final del periodo. Los datos relativos a la población, utilizados para el cálculo del consumo por habitante, proceden del Boletín Mensual de Estadística de las Naciones Unidas, de mayo de 1983.
