ANNEX 3 (GROUP "C")

All Other Entities which Procure in Accordance
With the Provisions of this Agreement

CANADA

Threshold: 130,000 SDRs for goods

Canada offers to seek to include, at the federal level, goods contracts for designated Group C entities under two distinct sub-groups, as outlined below, reflecting the degree of government control, regulation or influence upon such agencies.

The first sub-group would cover those entities which, though commercial in character are owned by the government and essentially perform a government function. Such entities would be subject to disciplines similar to current Code commitments, with modifications as negotiated, to take into consideration the special situation of entities having a commercial character.

The second sub-group would cover those entities which are essentially owned by the private sector but substantially influenced by the government. These entities would be subject to a "self-denial" commitment by the Government of Canada who will refrain from influencing the procurement decisions of those entities.

Canada further offers to seek to include, at the sub-central level, on a voluntary basis, within 18 months after the conclusion of the new procurement agreement, goods contracts for entities subject to substantial government regulation or influence on the basis of a "self-denial" commitment i.e. the provincial governments would undertake to refrain from influencing the procurement decisions of those entities.

GENERAL NOTE:

Notwithstanding anything in this Annex 3, this Agreement does not apply to procurements in respect of:

(a) shipbuilding and repair;

(b) rail and urban transportation equipment, systems, components and materials incorporated there-in as well as all project related materials of iron or steel; and
