

**ACUERDO GENERAL SOBRE ARANCELES
ADUANEROS Y COMERCIO**

RESTRICTED
Spec(94)45
24 de octubre de 1994

(94-2158)

Original: inglés

**ESLOVENIA - ADHESIÓN A LA ORGANIZACIÓN
MUNDIAL DEL COMERCIO**

Comunicación de Eslovenia

El Ministerio de Relaciones Económicas y Desarrollo de Eslovenia ha enviado la siguiente comunicación, relativa al procedimiento de adhesión de ese país a la Organización Mundial del Comercio.

En nombre del Gobierno de Eslovenia, se adjunta a la presente la documentación¹ que se indica a continuación, destinada al Grupo de Trabajo sobre la adhesión de la República de Eslovenia a la Organización Mundial del Comercio, con el propósito de que se la examine en la próxima reunión de conformidad con el mandato del Comité Preparatorio:

- Negociaciones sobre la agricultura, documentación justificante, con notas explicativas
- Declaración revisada sobre la conformidad de la legislación de la República de Eslovenia con las prescripciones del Acuerdo sobre las Medidas en materia de Inversiones relacionadas con el Comercio (MIC).

¹En inglés solamente.

Schedule XCVI - REPUBLIC OF SLOVENIA

PART IV - AGRICULTURAL PRODUCTS: COMMITMENTS LIMITING SUBSIDIZATION

(Article 3 of the Agreement on Agriculture)

SECTION III: Commitments Limiting the Scope of Export Subsidies

| Description of products | Nature of Commitments |
|-------------------------|-----------------------|
| 1 | 2 |

NIL

Explanatory Notes

Agricultural Negotiations Supporting Data - Domestic Support and Subsidies

1. The base year for the data in the supporting tables is 1992, which is the first year of independence and, therefore, these are the first available data specifically relating to the Republic of Slovenia.

2. In 1992, until November 21st of that year, there was in place a mechanism of producer financed support of agricultural production and export of certain groups of products (i.e. not specified according to a specific product). This mechanism was administered through so called "funds" which was a holdover of the previous system. These "funds" were applied for the following areas:

- cereals, - fruits and vegetables, - sugar, - fish, - hops,
- tobacco, - wine, - livestock and meat (including processed products), - edible oil.

The "funds" maintained, in a current year, fixed percentages of drawback, for groups of products, which were paid as an offset of costs, on the basis of invoices as proof of payment, of transportation, other charges, and in particular of duties paid for certain production inputs. The percentages were calculated on the basis of average cost of export in the previous year and were adjusted annually. For example, for wheat and corn, the fixed percentages in 1992 were 8.6% and 8.10% respectively.

The "funds" were organized within the framework of the Chamber of Economy. After November 21st, 1992, they were abolished and replaced by a unified (Business) Association of Alimentary Producers of Slovenia, on a voluntary basis. This association continued to perform a similar function as the "funds" for the remainder of 1992 and in 1993.

The Republic of Slovenia, now, does not have direct, product specific export subsidies. Export subsidies, indicated in supporting table 11, are in fact a similar type of assistance which was used in 1992, which in effect is a type of drawback system. It refunds a part of the costs incurred mainly for imported inputs, which are used in the production for export or subsidization of interest on commercial credits.

3. The most important branches of the Slovenian agriculture are dairying and livestock husbandry. To the Slovenian agriculture dairying brings about one third of the gross value of agricultural production, while dairying and livestock husbandry combined brings 80% of the gross value, which is compatible with the prevailing mountain farming and farming in border areas. For reasons of greater utilization of arable land and to relieve the pressure on animal husbandry, bread and feed grains and sugarbeet and oil seeds are equally important. The restructuring of agriculture is directed towards more extensive fruit and vegetable farming.

The sufficiency rate in grains is below 50%, in sugarbeet it is 42% and in oil seeds it is 4%. The difference in these items must be imported.

4. In the area of dairy production there is a guaranteed payment for the base price of milk, which is designed to protect farming in the mountain and border areas. In 1994 stricter quality requirements were introduced with staggered prices for different quality grades.

5. In the area of cereals, there is also a price guarantee designed to stimulate domestic production in bread grains, to keep an area under wheat and other grains in order to safeguard domestic supplies and to relieve the pressure on animal husbandry. The same applies to feed grains. The system allows a minimum return of income to the farmer. All durum wheat is imported. There is no domestic production.

Bread and pasta quality requirements and foreign economic policies mean that no more than 49% of common wheat can be produced domestically; the remaining 51% must be imported. In high-yield years some of the harvest of milling wheat must be used as livestock feed.

The national reserves sell domestic wheat, purchased from producers, to millers, at prices not exceeding the cost price (in fact, somewhat below cost). The duties on imported wheat serve to limit the domestic cost price and to equalize it with average import prices.

6. The domestic price of sugar beet is determined on the basis of the price of sugar. Imports of sugar are unrestricted, however, there is a guaranteed price of sugar which reduces the (single) sugar refinery's deficit. The refinery must sell the sugar refined in Slovenia, at a price equal to that of imported sugar, customs cleared. This may involve the sugar refinery in a substantial loss if the

world price of sugar is very low.

The sugar refinery is in a position to process domestic sugar beet even when sugar prices in the world market are extremely low. This helps to secure the country's supplies in situations of emergency and serves the purpose of promoting arable farming. Domestic production covers 42% of domestic consumption of sugar beets.

7. Farms, in general, on the basis of sustainable development of rural life and eco-sociological developemnt of high altitude and border area village communities, are eligible for subsidized interest on credits and loan guarantees for so called supplementary activities, which are mainly in the area of tourism and other small business.

STATEMENT PERTAINING TO CONFORMITY OF LEGISLATION OF THE
REPUBLIC OF SLOVENIA WITH THE REQUIREMENTS OF THE AGREEMENT
ON TRADE-RELATED INVESTMENT MEASURES (TRIMS)

Domestic legislation in the Republic of Slovenia is not specifically concerned with investment matters (with the exception of foreign investment), but merely touches upon these matters, particularly in the area of construction and engineering, including foreign projects, which are generally termed as "investment". None of the legislation, meaning laws and regulations, in any way prescribes any measures which would in any possible way concern the trade of goods, or otherwise attach conditions, impediments or restrictions. The legislation, in the areas which are termed as investment, is dealing with technical and other standards, and various procedures. To the contrary, legislation stimulates imports of capital investment goods under more favorable conditions, if the goods are not produced in the Republic of Slovenia or, if they are technologically and ecologically more advanced, in the form of temporary, non-discriminatory lowering or suspension of tariffs, which is specifically designed to better facilitate investment (including foreign investment). All legislation, i.e. laws and regulations are fully transparent in the sense that they are published regularly in the final, adoption, and preparation stage.

In bilateral investment treaties which the Republic of Slovenia has concluded or is in the process of concluding, there are no provisions which would, in any way, affect the trade of goods.

The Government has prepared a draft law, dated July 27th, 1994, which is presently being read in the Parliament, titled "Law on Foreign Investments". The draft and the currently applied law are available in an English translation.

This law will be the specific legislation dealing with foreign investment in the Republic of Slovenia by the time of the implementation of the WTO Agreement. The law itself will not relate, directly or indirectly, to the trade of goods. The core of the law will be provisions governing the facilitation of foreign investment, and provisions relating to procedures, conditions for investment, mainly regarding acquisitions and takeovers, exceeding a certain share of a Slovenian company, and rights and obligations of foreign persons and domestic persons in connection with foreign investment.

Discretionary authority will be limited to special conditions for acquisitions and takeovers of existing companies connection with safeguarding of national and

public interest. In no way does this authority apply to restrictions or to the conditioning of the trade of goods.

The law will prohibit foreign investment in the arms trade, in the production of arms and military equipment.

In all respects, the law will maintain national treatment of foreign investment, corresponding to paragraph 4, of Article III of GATT 1994 and will not impose any quantitative restrictions contrary to Article XI of GATT 1994. Further, the law will not contain any import or export restrictions in connection with investment, local content or any other similar requirements in foreign investment based production. Access to foreign exchange attributable to enterprises with foreign and any other kind of investment is fully guaranteed.

The Foreign Investment Office of the Republic of Slovenia will be responsible for access to information regarding conditions, rights and obligations and other guidance to foreign investors, apart from other administrative functions in the process of implementation of the law in question.

The Republic of Slovenia fully accepts the provisions of the Agreement on Trade-Related Investment Measures and will fully implement it respecting all obligations therein contained.
