

## Committee on Sanitary and Phytosanitary Measures

### UPDATE ON THE OPERATION OF THE STANDARDS AND TRADE DEVELOPMENT FACILITY

Note by the Secretariat<sup>1</sup>

#### Overview

1. The Standards and Trade Development Facility (STDF) is a global programme in capacity building and technical cooperation established by the Food and Agriculture Organization of the United Nations (FAO), the World Organisation for Animal Health (OIE), the World Bank, the World Health Organization (WHO) and the World Trade Organization (WTO). It assists developing countries to comply with food safety, animal and plant health (sanitary and phytosanitary or SPS) measures in international trade. Other international organizations such as the International Trade Centre (ITC), the Organization for Economic and Development (OECD), the United Nations Industrial Development Organization (UNIDO), and United Nations Conference on Trade and Development (UNCTAD), donors and developing countries also participate.<sup>2</sup>
2. The STDF has two main aims:
  - to assist developing countries enhance their expertise and capacity to analyze and to implement international sanitary and phytosanitary (SPS) standards, improving their human, animal and plant health situation, and thus ability to gain and maintain market access; and
  - to act as a vehicle for coordination among technical providers, the mobilization of funds, the exchange of experience and the dissemination of good practice in relation to the provision and receipt of SPS-related technical .
3. Applications for STDF funding may be made at any point in the year but should be received 45 days prior to each Working Group meeting. Forthcoming deadlines for submission of funding applications are as follows:
  - 19 December 2008;
  - 24 April 2009; and
  - 14 August 2009.
4. The STDF operates in four main areas: coordination, project development, project funding and information dissemination.

<sup>2</sup> More detailed information on the STDF can be found on the [website](http://www.standardsfacility.org) (www.standardsfacility.org)

## Coordination

5. The STDF organized a workshop on SPS-related capacity evaluation tools developed by international organizations on 31 March 2008. The meeting considered the merits of specific and generic tools; the role of the beneficiary in the choice of tool, its application and end use; public dissemination of results versus confidential usage; and scope for collaboration and cooperation in the future development and use of these tools. As a follow-up to the meeting, the Secretariat has drafted a detailed overview of the tools on offer, with information on their application and contacts for the organizations involved. The objective is to provide countries with a users' manual to help guide them in their choice of tool to evaluate their SPS needs. The document will be circulated shortly.

6. The STDF organized an information session on private standards on 26 June 2008. Representatives of the Africa Observer Project, the Global Food Safety Initiative (GFSI), International Certification and Risk Services (CMi) and the World Bank made presentations. Issues considered included: (i) initiatives to make developing countries' voices heard in the private standards area; (ii) advancements in the recognition of equivalence between schemes; (iii) options to reduce the costs of certification; and (iv) opportunities to promote dialogue among private standard holders, suppliers, certifiers and other interested parties. A summary of the workshop can be found in document G/SPS/R/50. Information about the workshop, including the presentations and podcasts of some sessions, is available on the [SPS gateway](#) of the WTO website.

7. Within the framework of the Aid of Trade Initiative, the STDF organized regional workshops on the mobilization of capacity building resources in the area of food safety, animal and plant health. These took place in Cambodia (20-21 May 2008), Uganda (28-29 May 2008) and Guatemala (11-12 June 2008).<sup>3</sup> The workshops were the culmination of a year-long project in the Greater Mekong Delta Sub-region, East Africa and Central America to synthesize the results of existing SPS capacity evaluations, develop an inventory of technical assistance and identify "gaps" still not being addressed. An overview of this work can be found in document G/SPS/GEN/864. A discussion paper outlining further possible STDF Aid for Trade activities will be discussed at the next STDF Working Group meeting in October 2008.

8. The STDF participated in an Expert Working Group meeting organized by UNIDO in Kigali, Rwanda, 8-9 September 2008. The STDF presented a study on SPS constraints faced by eight LDCs (Benin, Cambodia, Laos, Lesotho, Mozambique, Rwanda, Senegal and Yemen) which impede their export opportunities. The study compared needs with on-going and future planned assistance in this area. The objective is to feed this information into an LDC Ministerial Conference in Cambodia 19-20 November on Aid for Trade: Industrial Agenda for LDCs on how to mobilize and streamline Aid for Trade resources in LDCs. Once finalized, this report will also be shared with the SPS Committee.

9. An ongoing Aid for Trade activity funded by the Inter-American Development Bank (IADB) is a study to examine the need for and provision of SPS-related technical assistance in Peru. The aim of the research is to identify SPS needs and design a comprehensive national action plan to address them. It is expected that the study will be presented in early 2009.

10. In response to the WTO/OECD request for information (G/SPS/GEN/816), a total of 24 projects in East Africa, the Greater Mekong Delta Sub-Region and Central America were submitted as examples of "good practice" in SPS-related technical cooperation. Country-level research was carried

---

<sup>3</sup> Aid for Trade aims to help developing countries, particularly least-developed countries, develop the trade-related skills and infrastructure that is needed to implement and benefit from WTO agreements and to expand their trade. The Aid for Trade initiative was launched at the Hong Kong Ministerial Conference in December 2005.

out in June and July 2008 to seek the views of beneficiaries of the identified projects on elements of good practice in project design, implementation, outputs and the achievement of higher order objectives, which could be replicated in future assistance. The original research reports have been circulated to the SPS Committee as documents G/SPS/GEN/871, 872 and 874. The findings are being analyzed and compiled for presentation to a workshop on Good Practice in Geneva on 6 October 2008. An overview document with conclusions for action drafted has been circulated as document G/SPS/GEN/875.

11. The STDF is planning to organize a meeting in the first half of 2009 on initiatives to combat fruit flies in West Africa. The meeting will provide an opportunity for national and regional organizations, donors and other stakeholders to discuss mechanisms to control fruit flies and mobilize funds for a multi-year Action Plan for this purpose. It will gather technical experts in fruit fly as well as decision makers from West African countries and donors active in the region. The meeting will be centred around an EC study on the damages inflicted by fruit flies on West Africa fruit production and Action Plan for a coordinated regional response. The EC study was validated by ECOWAS Member States at a meeting organized in Mali in August 2008. It can be downloaded in English and French versions from the STDF website [Standards and Trade Development Facility](#).

### **Project development**

12. Project preparation grants (PPGs) are a key mechanism for future STDF programme development. PPGs aim to turn good ideas into projects. As such, they can help overcome constraints faced by developing countries in the articulation of their needs. To date, a total of 27 PPGs have been approved. A target of 12 PPGs to be funded through the STDF has been set in the Operating Plan for 2008-09.

13. At the June STDF Working Group meeting, three PPGs were approved:

- STDF 232: Development of an African phytosanitary capacity building strategy (Inter-African Phytosanitary Council);
- STDF 234: Design of a Good Agricultural Practice scheme for Lao P.D.R; and
- STDF 242: Design of a project to overcome SPS constraints in the litchi and lobster value chains in Comores.

### **Project funding**

14. The STDF funds technical cooperation activities which:

- address underlying issues of SPS capacity building in beneficiary countries (in particular in low income countries, or on a regional basis), ideally through innovative, preventative and / or pilot projects which may be replicated by other donors; and
- which aim to address gaps in SPS information, training materials or which aim to improve coordination among SPS technical providers through collaborative projects.

15. At the last STDF meeting in June, four new projects were approved for funding:

- STDF 126: Support for establishment of a Horticulture Development Council in Tanzania;
- STDF 230: Establishment in Mozambique of Pest Free Areas for Lethal Yellowing Disease in coconuts;

- STDF 238: Development of accredited Good Practice and HACCP certification schemes for fresh and processed products in Guatemala; and.
- STDF 246: Development of an SPS Action Plan for Cambodia.

16. Information on how to apply, eligibility criteria and application forms can be found in the [STDF Operational Rules](#). An overview of the current status of STDF projects is provided in Annex 1.

### **Information dissemination**

17. The STDF is developing a short film to raise awareness about the importance of SPS capacity for international trade and economic development. The film will provide an introduction to SPS issues and their impact on trade and showcase examples from three countries that have been affected by SPS issues. The selection and contracting of a production company to support this work is in progress following a tender process, and identification of case study countries is underway. It is hoped that the film will be finalized by mid-2009.

### **Evaluation**

18. An evaluation of the STDF is being undertaken by an independent evaluator. The objective of the evaluation is to review the performance of the STDF mainly in terms of the impact of STDF activities. A first independent evaluation of the operations of the Facility was completed in December 2005; the present evaluation should be completed by mid-November 2008.
