

Committee on Technical Barriers to Trade

**TWENTY-FIFTH ANNUAL REVIEW OF THE IMPLEMENTATION AND
OPERATION OF THE TBT AGREEMENT**

NOTE BY THE SECRETARIAT¹

The WTO Committee on Technical Barriers to Trade (the Committee) will conduct its twenty-fifth Annual Review of the implementation and operation of the WTO Agreement on Technical Barriers to Trade (the TBT Agreement) under Article 15.3 at its next meeting on 26-27 February 2020. This document contains information on developments in the Committee relating to the implementation and operation of the TBT Agreement from 1 January to 31 December 2019.

¹ This document has been prepared under the Secretariat's own responsibility and is without prejudice to the position of Members or to their rights and obligations under the WTO.

G. Members who validated their Enquiry Point information in 2019.....	58
H. Adopted final texts: website information	59

1 EXECUTIVE SUMMARY

- Mr. Sung-Hwa Jang (Korea) was elected by the TBT Committee as its Chairperson for 2019. Three regular meetings were held: on 5-7 March², 18-21 June³ and 12-15 November⁴;
- The Committee **began implementing the recommendations of the Eighth Triennial Review of the Operation and Implementation of the TBT Agreement**⁵ and adopted two new procedures on specific trade concerns and transparency (Section 2);
- Overall, there is a **high level of implementation of the TBT Agreement transparency obligations** by WTO Members. Since 1995: 142 Members (87% of membership) have submitted at least one notification of a proposed technical regulation or conformity assessment procedure (Article 10.6; Section 3.1.1); 142 Members (87% of membership) have submitted at least one notification of a statement on implementation and administration of the Agreement (Article 15.2; Section 3.2.2); and, 118 Members (72% of membership) provided updated contact information for their TBT Enquiry Point during 2019 (Articles 10.1 and 10.2; Section 3.3). However, only 23 Members (14% of membership) have submitted at least one notification of a bilateral or regional agreement on issues related TBT measures (Article 10.7; Section 3.2.1);
- Members **continue to improve implementation of notification obligations: 3,337 notifications** of new or changed TBT measures were submitted by **93 Members** during 2019, both all-time highs, following a consistent upward trend. However, 71 Members did not notify any proposed TBT measures during 2019 (Section 3.1.1);
- A handful of **African and Latin American Members were especially strong in notifying**: Uganda submitted the most notifications of any Member in 2019, and Kenya and Tanzania were amongst the top ten notifying Members. Ecuador, Brazil and Argentina were also amongst the top notifiers. African Members submitted just over a third of all new notifications in 2019, far more than any other regional group. (Section 3.1.2 and 3.1.4);
- The steadily rising number of notifications from developing and least-developed Members since 2004 is driving overall growth in notifications. **The majority of new notifications (63%) in 2019 were submitted by developing Members (61)**, while **least-developed Members (12) were responsible for 21%**. Notifications submitted by developing Members rose by nearly 10% compared to 2018 (Section 3.1.4);
- A record number of addenda were submitted by Members (1,101) in 2019, mostly communicating information related to the **adoption, publication or entry into force** of the measure. Amongst these, just over half included a website address to the adopted final text (Section 3.1.3);
- Members continue to **provide less than the recommended 60-day comment period** (an average of 56.1 days in 2019). This follows a declining trend since 2015. Nevertheless, on a more positive note, Members are increasingly using addenda to extend comment periods (Section 3.1.6);
- Use of the **TBT Notification Submission System** (TBT NSS) is increasing. 88% of all TBT notifications were submitted using the TBT NSS, up from 35% in 2014 (Section 3.1.8.1);
- Use of **ePing** is also increasing. The number of subscribers grew to 8,821 at the end of 2019, up from 5,569 at the end of 2018, around half of which are from the private sector (Section 3.1.8.2);
- The number of new specific trade concerns raised is the highest in any one year since 2015. Members discussed **185 specific trade concerns** (STCs), including 35 new concerns. As

² [G/TBT/M/77](#).

³ [G/TBT/M/78](#).

⁴ [G/TBT/M/79](#).

⁵ [G/TBT/41](#).

has been the case in recent years, the vast majority of STCs discussed in 2019 were previously raised STCs (Section 4.1);

- The large majority of new STCs raised in 2019 were about proposed measures (Chart 21), illustrating the **pre-emptive role of the Committee's STC discussion** in addressing trade frictions (Section 4.1);
- Since 1995, 68 Members (41% of membership) have raised at least one STC in the TBT Committee. In 2019, **35 Members (21% of membership)** raised at least one STC, compared to 33 in 2018 (Sections 4.1 and 4.2);
- **Developing Members are increasingly active in raising STCs.** As a group, in 2019, they raised the most new STCs in any year since 2015 (Section 4.4);
- An important share of the STCs discussed in the Committee are no longer on the agenda. **81% of all STCs** (discussed in the TBT Committee since 1995) **have not been raised over the past two years.** This may indicate some form of progress towards resolutions (Section 4.7);
- There is **complementarity between the notification of proposed measures and their discussion** in the Committee. 68% of all STCs raised between 1995 and 2019 relate to notified measures (Section 4.8);
- Two standardizing bodies notified their acceptance of the **Code of Good Practice for the Preparation, Adoption and Application of Standards**, and 57 notifications of work programmes were received from 31 standardizing bodies. Overall, 192 standardizing bodies from 144 Members or Observers have accepted the Code of Good Practice since 1995 (Section 3.2.3); and,
- A total of 37 TBT **technical assistance activities** were delivered by the Secretariat during 2019, including 13 national workshops (Section 6).

2 IMPLEMENTATION OF THE EIGHTH TRIENNIAL REVIEW

2.1. The TBT Committee began implementing the recommendations of the Eighth Triennial Review during 2019 as follows:⁶

- a. **Specific trade concerns.** At the June 2019 meeting, the Committee adopted (on a permanent basis) new procedures for the inclusion of specific trade concerns in the annotated draft agenda of the TBT Committee.⁷
- b. **Notifications.** At the November 2019 meeting, the Committee agreed on a revised format for addenda.⁸
- c. **Thematic sessions.** The Committee held five thematic sessions, in line with the work plan of the Eighth Triennial Review⁹:
 - i. March 2019: Good Regulatory Practice – focusing on domestic committees, and other administrative mechanisms, to facilitate internal coordination on TBT.¹⁰
 - ii. March 2019: Conformity Assessment Procedures – focusing on: post-market controls (e.g. market surveillance) and other pre-market controls; and risk assessment.¹¹
 - iii. June 2019: Transparency – Ninth Special Meeting on Procedures for Information Exchange.¹²
 - iv. November 2019: Standards – focusing on incorporating standards by reference in regulations.¹³
 - v. November 2019: Conformity Assessment Procedures – focusing on National Quality Infrastructure (NQI).¹⁴

3 TRANSPARENCY AND NOTIFICATIONS¹⁵

3.1 Notifications of technical regulations and conformity assessment procedures

3.1.1 Trends in new notifications and follow-up (addenda, corrigenda, revisions)

3.1. Members submitted a record number of notifications to the TBT Committee in 2019. In total, Members submitted 3,337 notifications of new or changed measures, the most in any year since 1995. This includes an all-time high in the number of addenda to existing notifications of technical regulations and conformity assessment procedures (1,101), as well as 2,074 new notifications, 74 corrigenda to existing notifications, and 88 revisions (Chart 1).¹⁶ Compared to 2018, the total number of notifications rose by 9%, maintaining the trend of a steady increase since 2004. Since the entry into force of the TBT Agreement and up to 31 December 2019, 142 Members (representing 87% of the full membership) have submitted at least one notification, totalling 36,641 notifications (see Annex A).

Chart 1: Total TBT notifications, 1995-2019¹⁷

3.2. Participation in submission of notifications in 2019 was higher than previous years, with 93 Members (57% of current WTO membership) submitting at least one notification during the year (Chart 2). However, 71 Members did not notify any proposed TBT measures during 2019.

¹⁵ The data for the charts in this section are drawn from the TBT IMS <http://tbtims.wto.org/>, complemented by more detail in Annex A. Further information on TBT notifications is available through the TBT IMS.

¹⁶ This document uses the terminology adopted by the TBT Committee in the recommendation on "Coherent use of notification formats", [G/TBT/35/Rev.1](http://www.wto.org/gatt/secretariat/tbt/rev1.htm), 21 November 2019. See Annex B.

¹⁷ Notifications of unofficial translations of notified measures, *supplements*, are not considered part of total TBT notifications for the purposes of this report. See Chart 8 for more details.

Chart 2: Members' participation in the notification process, 1995-2019

3.1.2 Notifications by Member

3.3. African Members were again amongst the most active in submitting TBT notifications in 2019, with three East African Community members in the top ten. Uganda submitted the most notifications of any Member for the third year in a row (Chart 3). Latin American Members (three) were also prolific notifiers, with Ecuador submitting the second highest number of notifications.

Chart 3: Ten Members that submitted most notifications (new notifications, addenda and corrigenda, and revisions) during 2019

3.4. The ten Members that have notified most frequently since 1995 are listed in Chart 4.

Chart 4: Ten Members that submitted most notifications (new notifications, addenda and corrigenda, and revisions) during 1995-2019

3.5. Taking a closer look at the five top notifying Members (US, Brazil, Uganda, EU, and China; Chart 4), Chart 5 shows that the annual volume of notifications submitted by these Members over the past ten years is relatively stable. Exceptions to this are the number of notifications submitted by the US over the past several years, which peaked in 2016, and those submitted by Uganda which rose dramatically as of 2017.

Chart 5: Notifications submitted by the EU, Brazil, Uganda, the US and China (new notifications, addenda and corrigenda, and revisions) during 2010-2019

3.1.3 Use of notification formats

3.6. The TBT Committee has agreed on a recommendation for the coherent use of different notification formats ("new notifications", "revisions", "addenda", "corrigenda", as well as "supplements"), which increases transparency of notified measures throughout the regulatory lifecycle. A revised recommendation was adopted at the November 2019 meeting annexing a

template to be used to indicate the reason for an addendum.¹⁸ The recommendation applies in various situations, for example, when the comment period on a notification has been extended (addenda, see Section 3.1.6 and Chart 15), if a measure has been withdrawn or revoked (addenda), a measure is substantially redrafted prior to adoption or entry into force (revision), or the adopted final text becomes available (addenda).

3.7. The use of addenda has increased significantly over recent years. Since 2011 more than 450 addenda have been notified every year, and in 2019 alone, 1,101 were notified (see Chart 1). Several Members are quite active in notifying information through addenda (Chart 6). The type of information provided in addenda varies.

Chart 6: Ten Members that submitted most addenda during 1995-2019

3.8. In 2019, the main type of information in addenda (59%) related to the adoption, publication or entry into force of the measure (Chart 7). Amongst these addenda relating to adoption, publication or entry into force of the measure, just over half included a website address to the adopted final text.¹⁹

¹⁸ [G/TBT/35/Rev.1](#), reproduced in Annex B.

¹⁹ [G/TBT/41](#), para. 6.19(e.i); [G/TBT/1/Rev.14](#), Section 6.3.1.11, page 33.

Chart 7: Reasons for addenda submitted during 2019²⁰

3.9. Contrary to addenda, the number of revisions submitted is low; between 2012 and 2018 the WTO received on average 32 revisions per year (Chart 1); this rose to 88 in 2019, 72% of which were submitted by Ecuador. The Members that have notified the most revisions since 1995 are Ecuador (72), China (45), the US (32), South Africa (25), Canada (25), Thailand (24) and Brazil (24). The EU is the only Member that has notified unofficial translations through supplements (Chart 8), although since 2017 this notification format has not been used. Of the 250 supplements notified by the EU, over 100 provide links to unofficial translations of measures notified by China.

Chart 8: Supplements notifying unofficial translations, 2009-2019

²⁰ Most addenda (78%) submitted in 2019 relate to measures originally notified in previous years.

3.10. The five top notifying Members use notification formats in different ways (Chart 9). The US continues to notify more addenda and corrigenda combined than new notifications, while China rarely uses these formats. As indicated above, revisions are rarely used.

Chart 9: Use of notification formats by the EU, Brazil, Uganda, the US and China during 1995-2019, total number of notifications

3.1.4 Notifications by development status and region

3.11. The rise in new notifications since 2004 (see Chart 1) is to a large extent explained by a marked increase in notifications submitted by developing Members (Chart 10). Again in 2019 the majority of notifications (63%) were submitted by 61 developing Members. Least-developed Members (12) were responsible for 21% of new notifications in 2019²¹ and developed Members (19) for only 16%. Only the level of notifications submitted by developing Members rose compared to 2018, an increase of nearly 10%; in contrast, notifications from developed Members decreased by nearly 10% and those from least-developed Members by 17%.

²¹ The top five notifying least-developed Members for the period 1995 to 2019 concerning new notifications are Uganda (1,155), Tanzania (366), Rwanda (284), Yemen (167) and Zambia (88).

Chart 10: New notifications by development status, 1995-2019

3.12. African Members once again submitted just over a third of all new notifications in 2019, far more than any other regional group, followed by Members in South and Central America and the Caribbean jointly with Asia, with shares of 20% each. Of the one third attributed to African Members, Kenya accounts for 25%, Uganda for 21%, Tanzania for 20%, Rwanda for 10% and Burundi for 7%. Compared to 2018, the main changes were an increase in notifications from South and Central America and the Caribbean, and a renewed decrease in notifications from the Middle East (Chart 11).

Chart 11: Distribution of new notifications by region, 2019

3.1.5 Regional approaches to notification

3.13. In recent years, groups of Members have coordinated notification of technical regulations and conformity assessment procedures adopted in regional economic communities, so as to notify such measures jointly to the WTO.²² The GCC Gulf Standards Organization is one group of Members that has submitted a significant number of joint notifications (Chart 12). The Andean Community has also made use of this approach, albeit to a much lesser extent (Chart 13).²³

Chart 12: New notifications by GSO members, 1995-2019

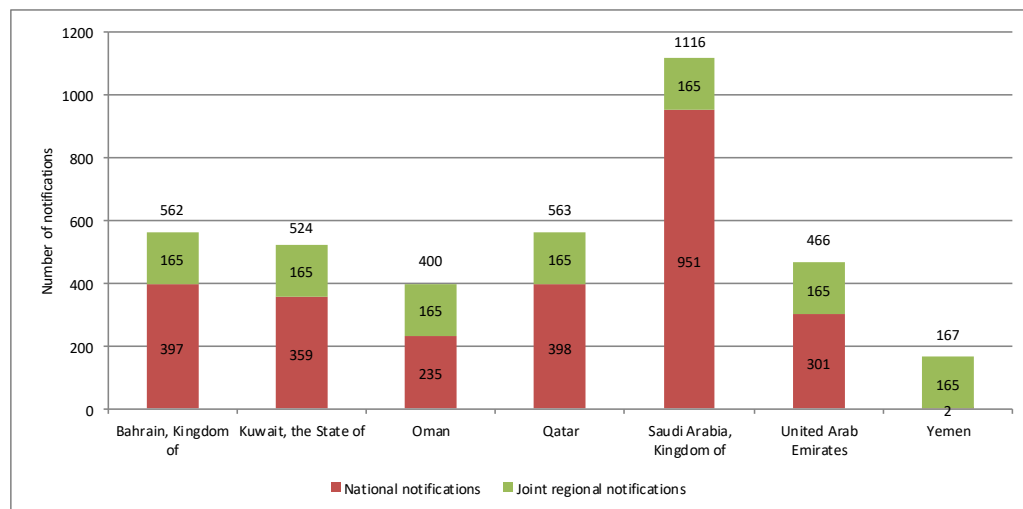

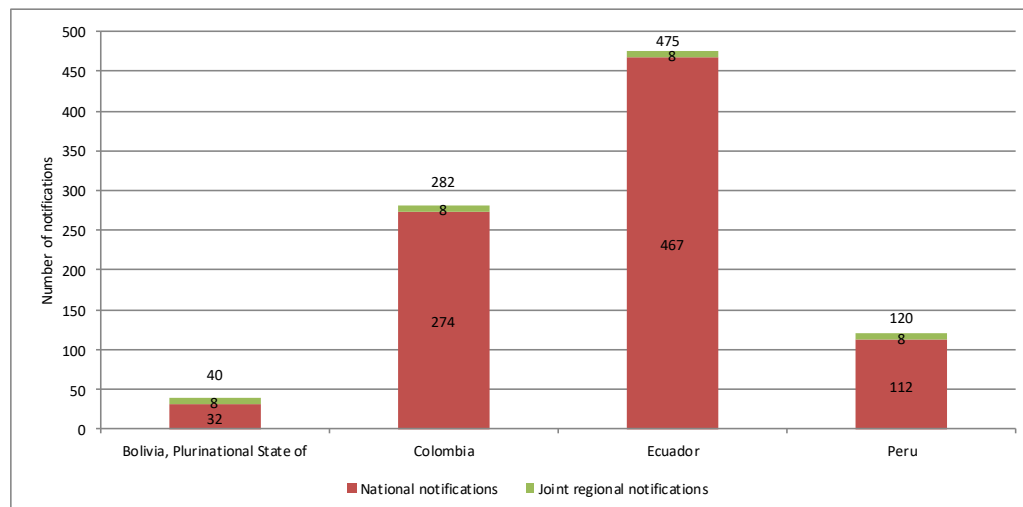

Chart 13: New notifications by Andean Community members, 1995-2019

3.1.6 Comment period provided in notifications

3.14. The Committee has agreed that the normal time limit for comments on notified technical regulations and conformity assessment procedures should be 60 days. Any Member able to provide a time-limit beyond 60 days, such as 90 days, is encouraged to do so and should indicate this in the notification.²⁴ In 2019, Members provided on average only 56.1 days for comments on new

²² Regional bodies or economic communities cannot notify on behalf of Members. It is Members that are responsible for fulfilment of the obligations on notification of draft measures contained in the TBT Agreement. For statistical purposes, a joint notification submitted by a group of Members is counted as an individual notification by each Member of the group.

²³ For statistical purposes, each notification submitted jointly by GSO Members counts as seven notifications in total notification counts, while each notification submitted jointly by Andean Community Members counts as four notifications.

²⁴ [G/TBT/1/Rev.14](#), Section 6.3.1.8, page 30.

notifications and revisions (of those 1,992 notifications which specified a comment period – Chart 14).²⁵ The tendency of Members to provide shorter average comment periods since 2015 continued in 2019.

Chart 14: Average number of days provided for comments, new notifications and revisions, all Members, 1996-2019

3.15. The average comment period provided by each Member in 2019 (who notified a total of five or more new notifications or revisions) is shown in Chart 15. In 170 new notifications and revisions submitted last year, there was no comment period included, the stated comment period had lapsed, or it was stated that a comment period was non-applicable. During the year, 13 Members²⁶ used the addendum format to notify extensions to comment periods on measures first notified in 2019; this information is also reflected in Chart 15. Annex C illustrates the percentage of notifications submitted in 2019 that provide a comment period, by Member (where five or more new notifications or revisions were notified).

²⁵ This chart covers only those notifications that specify a comment period. The chart does not take into account notifications where the comment period was not specified, was stated as non-applicable, or had lapsed at the time of circulation ("lapsed" means that the deadline for comments stated on the notification was earlier than the date of circulation of the notification).

²⁶ Ecuador, United States, Brazil, Honduras, Chile, Colombia, Korea, Australia, Guatemala, New Zealand, Panama, Thailand and Uruguay (in descending order).

Chart 15: Average comment period, by Member, 2019²⁷

²⁷ This chart includes only those Members that have notified five or more new notifications or revisions in 2019.

3.1.7 Stated objectives of notifications

3.16. "Protection of human health or safety" was once again overwhelmingly the primary objective stated in new notifications submitted in 2019 (Chart 16).²⁸ The second most cited objective was "Quality requirements", followed by "Consumer information, labelling", "Prevention of deceptive practices and consumer protection", and "Protection of the environment". When comparing this with the most cited objectives for the period 1995 to 2019, the top five objectives remain unchanged, albeit in a different order (Chart 17).

Chart 16: Notification by objective, 2019²⁹

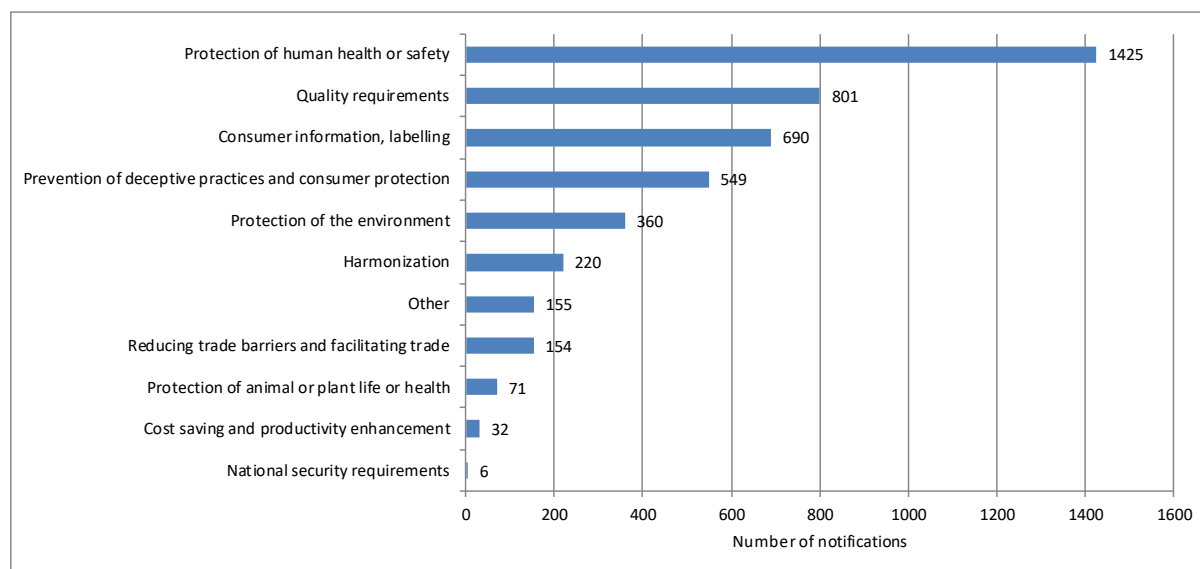

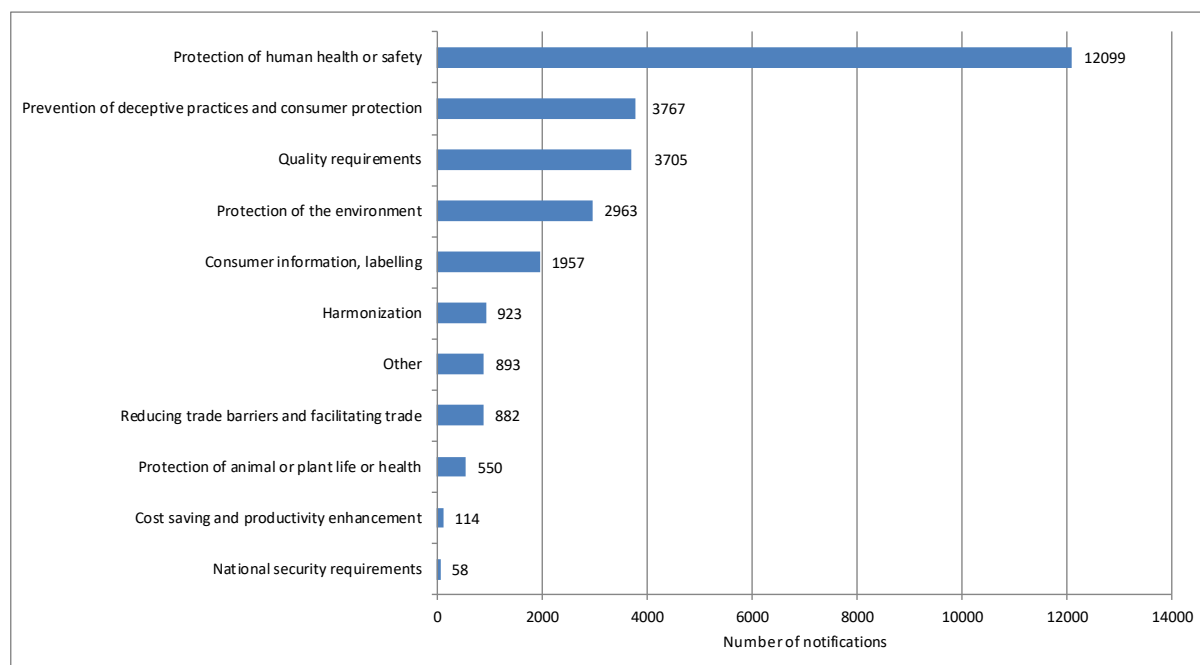

Chart 17: Notification by objective, 1995-2019³⁰

²⁸ The objectives are indicated by Members in Item 7 of the new notification template (see [G/TBT/1/Rev.14](#), pp. 66-69). Notifications may cite multiple objectives.

²⁹ 2 notifications over the stated period did not specify any objective.

³⁰ 76 notifications over the stated period did not specify any objective.

3.1.8 Online tools for notifications

3.1.8.1 TBT Notification Submission System

3.17. In 2019, 88% of all TBT notifications were submitted using the TBT Notification Submission System (TBT NSS)³¹, continuing a robust upward trend in the number of notifications submitted online (Chart 18).

Chart 18: Percentage of notifications submitted via the TBT NSS, 2014-2019

3.18. 68 Members (listed below) used the TBT NSS in 2019, up from 50 in 2018 (Table 1).³²

Table 1: List of Members that used the TBT NSS in 2019

³¹ [G/TBT/1/Rev.14](#), Section 6.6.4.1, pages 42-43.

³² For access to the TBT NSS, please contact tbtNSS@wto.org.

3.1.8.2 ePing: SPS/TBT notification alert system

3.19. Given the high volume and diversity of SPS/TBT notifications circulated annually, reaching 5,100 notifications in 2019, it can be a challenge for stakeholders to track and react to evolving product requirements in a timely manner. One of the recommendations of the Seventh Triennial Review concluded in 2015 was for the WTO Secretariat to develop an alert system to facilitate access to these notifications.³³ In response, the WTO partnered with UNDESA and ITC and launched ePing in November 2016. By registering on the publicly available system, users can receive daily or weekly email alerts containing SPS/TBT notifications covering products/markets of interest to them. In addition, ePing's web-based national and international discussion fora can assist Enquiry Points in reaching out to domestic stakeholders and other Enquiry Points to discuss specific notifications and/or exchange complementary information (such as full texts, translations or comments). These features can in turn facilitate the formulation of timely and coordinated comments and/or swift adaptation to new product requirements.

3.20. The Eighth Triennial review report adopted in 2018 contained two further recommendations specifically related to ePing.³⁴ First, the Committee agreed to discuss how ePing can facilitate the work of Enquiry Points and promote access to notifications by the private sector. During the transparency thematic session³⁵ held in June 2019, a number of Members shared their experiences in this regard and ePing was identified as a useful tool for tracking notified regulations, for domestic stakeholder consultation and for international information exchange among Enquiry Points, with a view to reducing trade frictions.³⁶ The Secretariat Background Note circulated in the context of the transparency thematic session also provided further details on registered users' countries and profiles.³⁷

3.21. Second, the Committee agreed to discuss the dissemination of comments received on notified draft measures and substantive replies on a voluntary basis, possibly via existing tools such as ePing. Following preliminary discussions during the June transparency thematic session and the November regular meeting³⁸, Switzerland was the first Member to disseminate official comments on a TBT notification via ePing's international information exchange forum on 20 December 2019.³⁹ In addition, Enquiry Points of Ghana and Malaysia used the forum to share full texts and translations of previously notified measures.⁴⁰

3.22. The Secretariat provided regular updates to the TBT Committee on ePing during the March, June and November meetings.⁴¹ In addition, an ePing walk-in session was held on the margins of the November TBT Committee meeting to present recent enhancements and answer specific queries from Members. Furthermore, ePing was presented during the SPS Committee's workshop on transparency and coordination held in July 2019.⁴²

3.23. Since its launch, ePing has seen a steady rise in subscribers from both the public and private sectors. On 1 January 2019, ePing had 5,569 registered users; by 31 December the number had gone up to 8,821 from 179 countries and territories.⁴³ Around half of registered users are from governments and the rest from private companies, non-governmental organizations, academia and regional/international organizations. Since the beginning of 2018, the online registration form for

⁴⁰ See for example <https://www.epingalert.org/en#/Forum/76102/international> and <https://www.epingalert.org/en#/Forum/76912/international>

⁴¹ [G/TBT/GEN/262](#); https://www.wto.org/english/tratop_e/tbt_e/2_a_secretariat.pdf; [G/TBT/GEN/274](#).

⁴² https://www.wto.org/english/tratop_e/spis_e/workshop15072019_e/d1_s3_eping_e.pdf

⁴³ In terms of their registration filters for alerts, 67% of users are interested in receiving notifications affecting "all" products while 33% have selected more specific product categories. With respect to their filters regarding "notifying Members", 87% of registered users are interested in receiving notifications from all Members while others have identified specific trading partners. Regarding types of notifications, 86% are interested in tracking both SPS and TBT notifications while 8% prefer to track TBT notifications only and 6% SPS notifications only.

ePing includes a question as to whether the private sector subscriber is from a company with more or less than 250 employees. The responses indicate that around half of them are from companies with less than 250 employees.

3.24. Table 2 shows the 20 Members with the highest number of registered users. In addition, TBT officials from 81 Members have been granted admin rights upon their request, allowing them to manage ePing at the national level.

Table 2. Members with highest number of ePing registrations

	Member	Number of ePing registrations
1	United States of America	348
2	United Kingdom	342
3	Australia	334
4	Uganda	306
5	Turkey	290
6	Japan	277
7	China	257
8	Malaysia	244
9	Indonesia	242
10	Philippines	238
11	Brazil	213
12	New Zealand	207
13	Canada	198
14	Rwanda	195
15	Tanzania	186
16	Viet Nam	183
17	India	180
18	Peru	166
19	Germany	159
20	Egypt	158

3.25. The WTO, ITC and UNDESA have continued their collaboration in maintaining and introducing enhancements to the system considering experience gained as well as feedback from users. Some of the enhancements have included a more dynamic and user-friendly homepage, a simplified platform for users to share follow up information on notifications and inclusion of all SPS and TBT notifications since 1995. Resources permitting, further enhancements are planned for 2020.

3.2 Other TBT notifications

3.2.1 Notifications under Article 10.7

3.26. No agreements were notified under Article 10.7 in 2019. Since 1995, 149 agreements, four revisions, four corrigenda and one addendum have been notified under Article 10.7. Overall, 23 Members (14% of membership) have submitted at least one notification under Article 10.7.

3.2.2 Notifications under Article 15.2

3.27. In 2019, two notifications were submitted under Article 15.2 of the TBT Agreement with respect to measures in existence or taken to ensure the implementation and administration of the

TBT Agreement, both of which were revisions to previous notifications by Canada and Kenya.⁴⁴ In total, 142 Members have submitted at least one notification under Article 15.2 (see Annex F).

3.2.3 Notifications under the Code of Good Practice for the preparation, adoption and application of standards ("Code of Good Practice")

3.28. Since the launch of the [WTO ISO Standards Information Gateway](#) in November 2016, there has been a significant increase in engagement by Members and standardizing bodies in notifying both the acceptance of the Code of Good Practice and sharing work programmes. This trilingual platform provides information on standardizing bodies that have accepted the Code of Good Practice and, if available, their work programmes. In 2019, two standardizing bodies notified the acceptance of the Code and 57 notifications of work programmes (existence or updates) were received from 31 different standardizing bodies.⁴⁵ Websites are now the most common way of making work programmes available. At the end of 2019, 119 Standardizing bodies had provided hyperlinks to where their work programmes can be found (others provide the work programmes as pdf files, which are made available on the gateway).

3.29. Between 1995 and 2019, 192 standardizing bodies from 144 Members or Observers accepted the Code of Good Practice. In addition, one regional standardizing body has accepted the Code: the African Organisation for Standardisation. The full list of Standardizing bodies that have accepted the code can be downloaded on the [TBT IMS](#). The [Standards Information Gateway](#) contains links to work programmes, the forms for the acceptance of and withdrawal from the Code of Good Practice, as well as the form to notify work programmes.

3.3 TBT Enquiry Points

3.30. In 2019, the Secretariat reached out to Members with respect to the functioning of Enquiry Points as included in the Eighth Triennial Review recommendation:

"To encourage Members to validate the contact information of their Enquiry Points as contained in the TBT IMS to improve the accuracy and availability of this information. Members are encouraged to either inform the Secretariat that the current information is correct, or to provide the Secretariat with updated information, by the March 2019 meeting"⁴⁶

3.31. With a view to facilitating the validation process, the Secretariat contacted Enquiry Points requesting them to verify and update as necessary their contact information as shown on the [TBT IMS](#). By 31 December 2019, the Enquiry Points of 118 Members had responded to this request. Of these, 36 confirmed that their contact details were correct, while 83 provided updated information on aspects such as contact persons, addresses, email addresses, and telephone numbers. All changes signalled by Members have been updated in the TBT IMS. Annex G provides a list of the 118 Members who validated their Enquiry Point information in 2019. Those Members which have not yet done so are invited to provide this information to the Secretariat by email (tbt@wto.org).

3.4 Adopted final texts: website information

3.32. In the Eighth Triennial Review, the Committee recommended that Members provide the Secretariat with up-to-date website information for where adopted final texts of technical regulations, as well as applicable conformity assessment procedures, can normally be accessed.⁴⁷ To date, 22 Members have provided this information to the Secretariat. A list of the websites is contained in Annex H.

⁴⁴ The latest list of statements submitted under Article 15.2 is available in the TBT IMS under "reports" (<http://tbtims.wto.org>). This information was previously circulated in the [G/TBT/GEN/1/-](#) series). The list is also included in Annex F.

⁴⁵ The standardizing bodies who accepted the Code in 2019 are: The Calendaring and Scheduling Consortium ("CalConnect") and ASD-STAN. The full list of the standardizing bodies that have accepted the Code can be accessed from the WTO ISO Standards Information Gateway (<https://tbtcode.iso.org/sites/wto-tbt/list-of-standardizing-bodies.html>).

⁴⁶ [G/TBT/41](#), para. 6.19.a.i.

⁴⁷ [G/TBT/41](#), para. 6.19.e.iii-iv.

4 SPECIFIC TRADE CONCERNS⁴⁸

4.1. The TBT Committee provides Members with a forum to discuss trade issues related to technical regulations, conformity assessment procedures and standards, prepared, adopted or applied by other Members. These discussions are referred to as "specific trade concerns" (STCs) and relate either to proposed or final measures. Members thus have the opportunity to review STCs in a multilateral setting, and to seek further information and clarification, working towards resolution of concerns.

4.1 Trends in STCs

4.2. In 2019, Members reviewed a total of 185 STCs, including 35 new concerns. The number of new concerns raised is the highest in any one year since 2015, 13 more than in 2018 (Chart 19). As has been the case in recent years, the vast majority of STCs discussed in 2019 were previously raised STCs. In 2019, Members discussed 150 previously raised concerns in TBT Committee meetings⁴⁹, down from 162 in 2018.⁵⁰ The calculation method applied for the first time in the 2016 Annual Review for the "previously raised STCs" category has again been used.⁵¹ Since 1995, 68 Members (41% of the full membership) have raised at least one STC in the TBT Committee.

Chart 19: STCs raised, 1995-2019

⁴⁸ The data for the charts in this section are drawn from the TBT IMS <http://tbtims.wto.org/>. Further information on STCs is available through the TBT IMS.

⁴⁹ Each time an STC is raised in the Committee, it is counted, regardless of whether the STC has been raised before in the same calendar year either as a new or previously raised STC.

⁵⁰ A summary of the STCs raised in the Committee in 2019 can be found in Annex D. Annex E provides a more detailed overview of new STCs raised in 2019.

⁵¹ See [G/TBT/39/Rev.1](#), para. 3.19. In Annual Review reports issued prior to 2016, an STC raised in the Committee in a given year was only included once in the statistics, either as a new or as a previously raised STC, regardless of the number of times the STC was raised that year. An STC raised for the first time in June and again in November, for example, was included as new, but not as previously raised for that year. This method underreported the number of previously raised STCs. Beginning in 2016, and again in this review, an STC is counted each time it has been raised in a TBT Committee meeting. If raised for the first time, it is counted as a new STC. If it is raised again, it is counted as a previously raised STC. In other words, Members can be subject to the same STC more than once in the same year and each time the STC is raised in the Committee, it is counted. This gives a more accurate reflection of the number of concerns actually discussed in the Committee in any given year (see Annex D).

4.3. Chart 20 shows the number of STCs discussed per TBT Committee meeting. In 2019, 59 STCs were discussed at the March meeting, 64 STCs at the June meeting, and in November, 62 STCs (Chart 20). This illustrates the steadily increasing workload for the Committee arising from STCs. While in 2009, around 43 STCs were discussed on average per meeting, this number rose to nearly 62 by 2019.

Chart 20: STCs raised per Committee meeting, 2009-2019

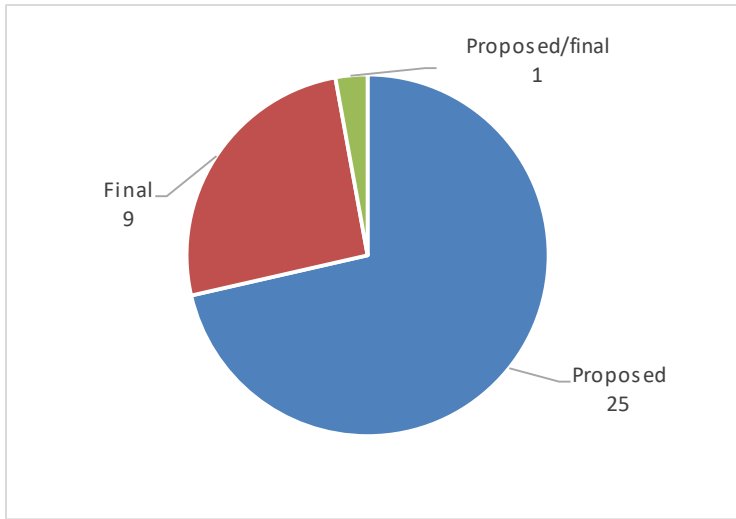

4.4. Members often withdraw a few STCs at the outset of Committee meetings, presumably because of progress made in bilateral discussions, and these are not reflected in Charts 1 and 2. In 2019, Members withdrew 5 STCs at the outset of Committee meetings, as compared to 4 in 2018 and 7 in 2017.⁵²

4.5. As a result of the Eighth Triennial Review, the TBT Committee agreed to new procedures for the inclusion of specific trade concerns in the annotated draft agenda of the TBT Committee.⁵³ These procedures were applied since March 2019. They include an earlier deadline for submitting STCs and circulation of the annotated draft agenda ahead of meetings, and also require that Members provide information about whether STCs are in respect of proposed or final measures. The large majority of new STCs raised in 2019 were in respect of proposed measures (Chart 21), illustrating the pre-emptive role of the Committee's STC discussion in addressing trade frictions.

⁵² [G/TBT/M/71](#) - [G/TBT/M/79](#).

⁵³ [G/TBT/43](#). In the Eighth Triennial Review, Members agreed to apply the procedures on a trial basis for the March and June 2019 meetings ([G/TBT/41](#), para. 8.2 (b.i), and footnote 305). At the June 2019 meeting of the TBT Committee, Members agreed to apply these procedures on a permanent basis ([G/TBT/M/78](#), para. 3.331).

Chart 21: Proposed and final measures, new STCs raised in 2019

4.2 STCs by Member

4.6. The US, EU and Canada were the Members that raised most STCs in 2019 (Chart 22). The large majority of these STCs were not new but raised previously.⁵⁴ In 2019, 35 Members raised at least one STC (new or previously raised), compared to 33 in 2018.

Chart 22: Ten Members that raised most (new and previously-raised) STCs during 2019

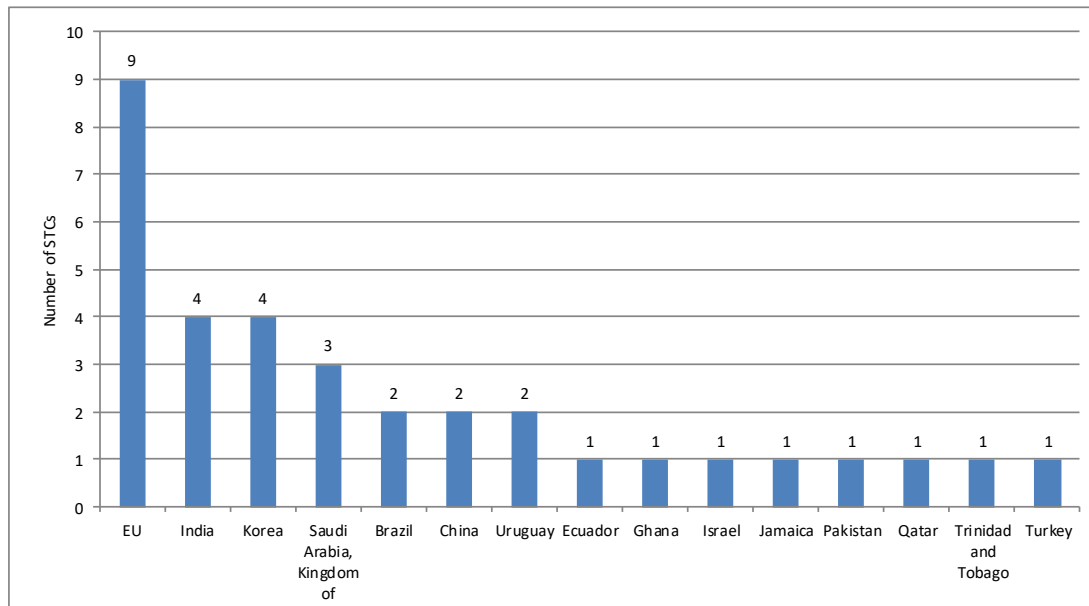

4.7. Chart 23 displays a similar trend: the EU and the US raised most new STCs during the period 1995 to 2019, more than 270 each.

⁵⁴ More than one Member may raise concerns (new and previous) about the same STC. Members can raise the same STC more than once in the same year; it is counted each time it is raised.

Chart 23: Ten Members that raised most new STCs during 1995-2019

4.3 Members subject to new STCs

4.8. Measures of the EU, as well as of India, Korea, and the Kingdom of Saudi Arabia, were subject to most new STCs raised in the Committee in 2019 (Chart 24).

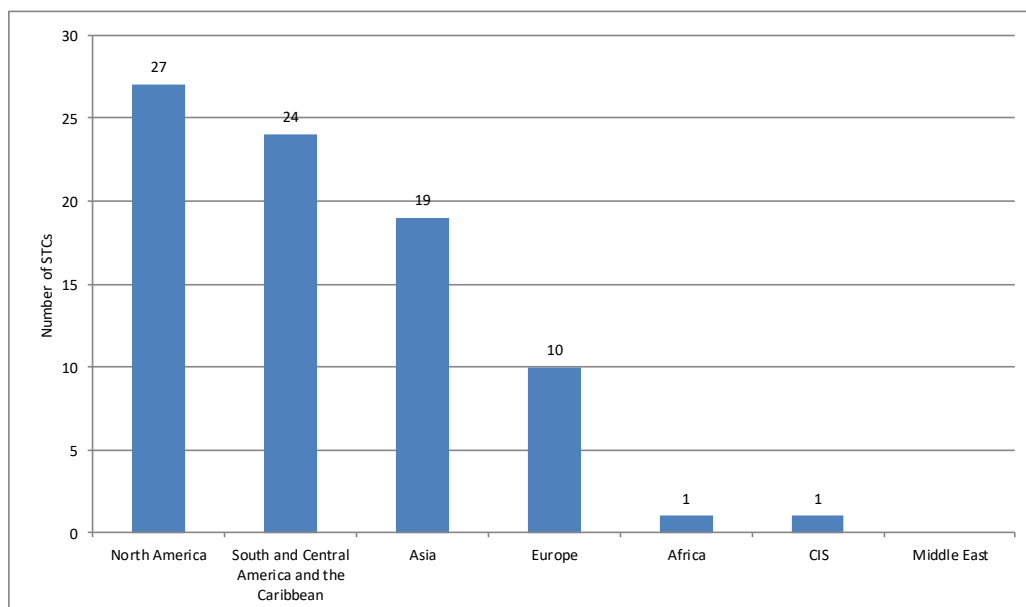

Chart 24: Members subject to new STCs during 2019

4.9. Overall, the EU was the Member subject to most STCs in the Committee between 1995 and 2019, followed by China and the US (Chart 25).

Chart 25: Members subject to most new STCs during 1995-2019

4.4 STCs by region and development status

4.10. Charts 26 and 27 provide information on the regional breakdown of participation in STC discussions. In 2019, Members from North America raised 27 new STCs, from South and Central America and the Caribbean, 24 new STCs, and from Asia, 19 new STCs. No new STCs were raised by Members from the Middle East (Chart 26).

Chart 26: New STCs raised by region, 2019⁵⁵

4.11. On the other hand, Members from Asia were subject to most new STCs, followed by Members from Europe and the South and Central America and the Caribbean (Chart 27).

⁵⁵ "New STCs raised by region" indicates the number of times a Member in a given region has raised a new STC. One STC can be raised by several Members from different regions.

Chart 27: Subject to new STCs by region, 2019

4.12. In 2019, 13 of the 35 new STCs were raised by developed Members, 13 by developing Members, and 9 by both developing and developed Members. No least-developed Member raised a new STC during the year. These shares have fluctuated over the years, but in general developing Members have become more active in raising new STCs (Chart 28). Compared to previous years, developing Members were more active in raising STCs during 2019; developing Members raised the most new STCs in any year since 2015.

Chart 28: New STCs raised by development status, 1995-2019⁵⁶

4.5 Types of concerns raised in STCs

4.13. Of the issues highlighted by concerned Members in new STCs raised in 2019, 20 dealt with concerns about lack of notification or opportunity to comment (transparency), 17 with concerns about unnecessary barriers to trade, 16 with the concerned Members' need for more information on

⁵⁶ This chart indicates the development status of Members that raised a new STC. An STC can be raised by several Members, each with a different development status.

state of play of a measure, or clarification on certain elements thereof, 16 with inconsistency with or non-use of international standards, 13 with the time given for manufacturers to adapt to new requirements (6-month reasonable interval), 10 with concerns about discrimination, and 9 with concerns about the legitimacy of the measure (Chart 29). In addition, a number of other issues were raised in 27 instances.⁵⁷

Chart 29: Types of concerns raised, 1995-2019⁵⁸

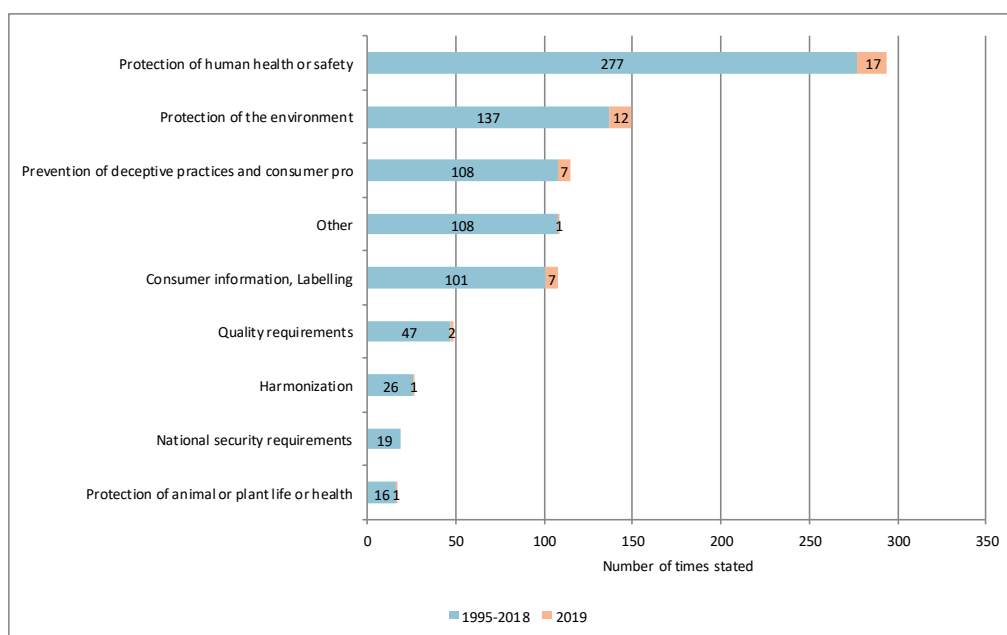

4.6 Stated objectives of measures subject to STCs

4.14. By far the most common stated objective of measures subject to STCs between 1995-2019 was "Protection of human health and safety", matching the main objective cited in TBT notifications (Chart 30, Chart 17). Information about the stated objective of measures subject to STCs is derived from the notification itself, or through the discussion of the particular measure in the Committee.

⁵⁷ 'Other issues' cover a range of otherwise unclassified concerns, e.g. the burdensome nature of requirements, the absence of scientific evidence, or unpredictability and lack of clarity of the measure.

⁵⁸ Concerned Members may raise more than one type of concern per STC.

Chart 30: Stated objectives for the measures raised as STCs, 1995-2019⁵⁹

4.7 Number of times STCs are raised

4.15. The number of times that an STC is raised may be related to the importance Members attach to the concern or whether progress was made in addressing concerns. STCs which are raised at only one or two meetings may represent concerns for which some progress was found. On the other hand, longstanding STCs raised at five or more meetings may represent concerns for which less progress has been made. The majority of STCs (56%) have been raised at one or two Committee meetings, 25% were raised 3 to 5 times, and only 19% were raised more than 5 times (Chart 31).

Chart 31: Number of times an STC is raised, 1995-2019

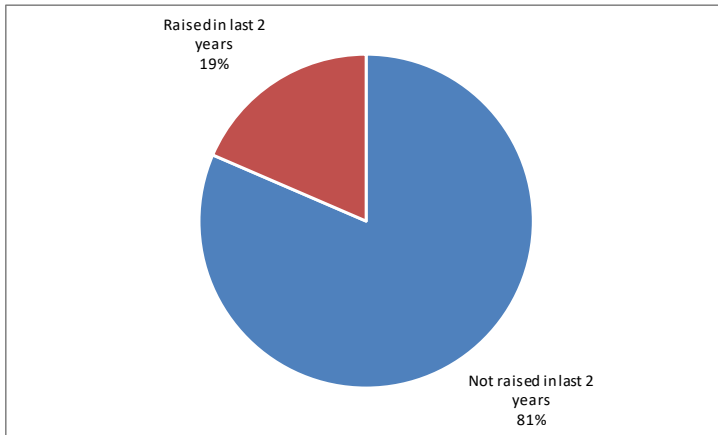

4.16. Moreover, 81% of all STCs (discussed in the TBT Committee since 1995) were not raised over the last two years (i.e. during the last six meetings of the Committee) (Chart 32). The remaining 19% were raised over the last two years.⁶⁰ These figures indicate that an important share of the

⁵⁹ Measures subject to STCs may have more than one objective. Each objective identified is counted.

⁶⁰ Around half of the STCs included in this group were brought to the Committee for the first time ("new STCs") over the past two years. The other half are STCs that were first brought to the Committee prior to 2018.

STCs discussed in the TBT Committee are no longer on the agenda, and presumably some form of progress was achieved, or Members pursued the issue through other means.

Chart 32: Share of STCs discussed in last 2 years, raised during 1995-2019

4.8 Relationship between notifications and STCs

4.17. The number of notifications submitted and STCs raised have generally followed a similar trend from 1995 to 2019 (Chart 33, Chart 1, Chart 19).

Chart 33: Notifications and new and previous STCs, 1995-2019

4.18. Overall, 68% of STCs raised since 1995 concern a measure notified to the TBT Committee. In 2019, 69% of new STCs raised were related to notified measures (Chart 34).

Chart 34: New STCs discussed related to notified measures, 1995-2019

5 DISPUTES INVOLVING PROVISIONS OF THE TBT AGREEMENT

5.1. Since 1995, 55 WTO disputes have cited the TBT Agreement in their respective requests for consultations, the first formal step to initiate a WTO case. During 2019 Indonesia submitted a consultation request concerning certain measures by the European Union on palm oil and oil palm crop-based biofuels (DS593).

5.2. In addition, during 2019 the appeal proceedings of these two TBT disputes were still ongoing:

- a. Ukraine's appeal, followed by the Russian Federation's cross-appeal, of the 2018 Panel Report deciding a dispute brought by Ukraine against certain Russian measures affecting the importation of railway equipment (DS499)⁶¹; and
- b. Honduras' and the Dominican Republic's appeals of the 2018 Panel Report deciding disputes they brought against certain Australian measures mandating tobacco plain packaging (DS435 and DS441, respectively).⁶²

6 SECRETARIAT TECHNICAL ASSISTANCE ACTIVITIES

6.1. Similar to previous years, in 2019 the Secretariat continued to receive requests for, and deliver, a significant number of TBT-related technical assistance ("TBT TA") activities. This is consistent with the fact that demand for TBT TA has grown substantially over the last few years. In 2019, 37 such activities were organized by the WTO Secretariat. These activities covered TBT matters either exclusively or in part. Some were organized in cooperation with other WTO Secretariat Divisions (e.g. Agriculture and Commodities Division's SPS team) or international organizations. The activities included, for example, two Geneva-based advanced TBT courses, six regional TBT workshops, and 13 national TBT workshops. Like in the previous year, 2019 was also marked by a particularly strong demand for, and delivery of, *national* TBT TA activities. This may indicate a new trend as the numbers of national TBT TA activities delivered in 2018 (15) and 2019 (13) were markedly higher than those delivered in 2017 (10) and 2016 (7). For the first time, the WTO Secretariat organized a Advanced Short Course on TBT in November 2019.⁶³ These activities were designed to help participants expand their understanding of the TBT Agreement, discuss challenges in implementing the Agreement and to learn more about the work of the TBT Committee. Like in the previous year, in 2019 there was also a marked demand for training activities on TBT transparency in general, and ePing in particular. Looking ahead, and as indicated in previous Annual Reviews, TBT transparency continues to be an issue of increasing interest to Members, and there is growing demand for TA in this area, particularly on ePing.

6.2. The Secretariat received an increasing number of capacity building requests related to ePing and has continued to include ePing in its capacity building activities, sometimes through brief presentations and sometimes through detailed hands-on training sessions, depending on the context, beneficiaries and their requests. In addition, upon request, tailored training materials have been provided to Enquiry Points for them to run training sessions for their domestic stakeholders. A user guide as well as a short introductory film on ePing can also be accessed through the ePing website. In addition, a 2-page flyer on ePing is available in seven languages (Arabic, Chinese, English, French, Japanese, Russian and Spanish) and can be downloaded from the ePing website under 'reference materials'.

6.3. Additionally, during the course of 2019, a total of 14 TBT modules were delivered within the programmes of various broader WTO TA activities, including Geneva-based and Regional Trade Policy Courses ("RTPCs"). Finally, in 2019, three distance learning courses specifically on the TBT Agreement were held.

⁶¹ Ukraine's appeal and Russia's cross-appeal were submitted on 27 August 2018 and 3 September 2018, respectively. These proceedings continued over 2019 and were still ongoing in 2020 (as of the date of circulation of this Note).

⁶² The appeals were submitted by Honduras and the Dominican Republic on 19 July 2018 and 23 August 2018, respectively. These proceedings continued over 2019 and were still ongoing in 2020 (as of the date of circulation of this Note). The Panel Reports of the disputes brought by Cuba and Indonesia against the same Australian measures (DS458 and DS467, respectively) were not appealed. These Panel Reports were thus adopted by the Dispute Settlement Body on 27 August 2018.

B. Revised Recommendation of the Committee on Coherent Use of Notification Formats²

The Committee on Technical Barriers to Trade makes the following revised recommendation to enhance the coherent use of the notification formats:

Type	Description
New Notification	Members should use a new notification ³ to notify the draft text of a proposed technical regulation or conformity assessment procedure (hereafter referred to as the "notified measure"). If the notified measure is associated with a previously notified measure (e.g. amending or supplementing an adopted measure, or replacing a withdrawn or revoked measure), the symbol(s) of the associated notified measure(s) should be indicated in Box 8 of the new notification.
Addenda	<p>Members should use an addendum (see the annexed template) to notify additional information related to a notification or the text of a notified measure, including if:</p> <ul style="list-style-type: none"> • The comment period has been changed (e.g. extended or re-opened); • The notified measure is adopted, published, or enters into force, especially in cases where relevant dates have not been provided in the original notification or have been changed. Members are encouraged to indicate how the final text of the measure can be obtained, including website address; • The notified measure is withdrawn or revoked. If replaced with a new measure, where possible, the symbol of the corresponding new notification should be indicated; • The content or scope of a notified measure is partially changed or amended. In this case, Members should consider opening a new comment period; • Interpretive guidance is issued; and • Any other useful and relevant additional information directly related to a notification or notified measure has been made available that does not qualify as a corrigenda, revision or supplement.
Corrigenda	<p>Members should use a corrigendum to correct minor administrative or clerical errors (which do not entail any changes to the meaning of the content) in:</p> <ul style="list-style-type: none"> • a notification or subsequent related addendum or revision; and • the text of the notified measure.
Revision	Members should use a revision to indicate that the notified measure has been substantially re-drafted prior to adoption or entry into force. A revision replaces the original notification. A revision should normally open a new comment period.
Supplement	Members should use a supplement to notify the availability of unofficial translations of notified measures. ⁴

² [G/TBT/35/Rev.1](#), 21 November 2019.

³ A "notification" refers to the official WTO document which is part of document series "G/TBT/N/[three digit country code]/#".

⁴ In 2007 the TBT Committee agreed ([G/TBT/M/43](#), Section II.C.3, 21 January 2008) that Members should use the formats for unofficial translations contained in [G/TBT/1/Rev.11](#), Annex 5 – Unofficial Translations. Further information is contained in [G/TBT/GEN/66](#).

NOTIFICATION

Addendum

The following communication, dated [Date], is being circulated at the request of the delegation of [Member].

Title: [Notified measure]

Reason for Addendum:	
<input type="checkbox"/>	Comment period changed - date:
<input type="checkbox"/>	Notified measure adopted - date:
<input type="checkbox"/>	Notified measure published - date:
<input type="checkbox"/>	Notified measure enters into force - date:
<input type="checkbox"/>	Text of final measure available from ⁵ : [Website / CRN attachment(s) in pdf format ⁶ / Free text]
<input type="checkbox"/>	Notified measure withdrawn or revoked - date: Relevant symbol if measure re-notified:
<input type="checkbox"/>	Content or scope of notified measure changed New deadline for comments (if applicable):
<input type="checkbox"/>	Interpretive guidance issued and text available from: [Website / CRN attachment(s) in pdf format ² / Free text]
<input type="checkbox"/>	Other:

Description: [Free text – brief summary]

⁵ This information can be provided by including a website address, a pdf attachment, or other information on where the text of the final measure can be obtained.

⁶ See [G/TBT/GEN/65](#), 14 December 2007.

C. Percentage of notifications that contain a comment period, by Member, 2019⁷

⁷ This chart includes only those Members that have notified five or more new notifications or revisions in 2019.

D. Summary of STCs raised in 2019

The following table lists the 185 specific trade concerns raised in the TBT Committee during 2019 (comprising 85 individual STCs). The second column contains the name of the specific trade concern.

Symbol	Title	Date last raised	Members raising	Frequency raised (1995-2019)	Number of times raised (2019)
274	India - New Telecommunications related Rules (Department of Telecommunications, No. 842-725/2005-VAS/Vol.III (3 December 2009); No. 10-15/2009-AS-III/193 (18 March 2010); and Nos. 10-15/2009-AS.III/Vol.II/(Pt.)/(25-29) (28 July 2010); Department of Telecommunications, No. 10-15/2009-AS.III/Vol.II/(Pt.)/(30) (28 July 2010) and accompanying template, "Security and Business Continuity Agreement") (ID 274)	13 November 2019	4	28	3
294	China - Requirements for information security products, including, inter alia, the Office of State Commercial Cryptography Administration (OSCCA) 1999 Regulation on commercial encryption products and its on-going revision and the Multi-Level Protection Scheme (MLPS) (ID 294)	13 November 2019	7	27	3
332	Russian Federation - Draft Technical Regulation on Alcohol Drinks Safety (published on 24 October 2011) (ID 332)	13 November 2019	9	24	3
328	Indonesia - Technical Guidelines for the Implementation of the Adoption and Supervision of Indonesian National Standards for Obligatory Toy Safety (ID 328)	13 November 2019	5	24	3
345	European Union - Draft Implementing Regulations amending Regulation (EC) No. 607/2009 laying down detailed rules for the application of Council Regulation (EC) No 479/2008 as regards protected designations of origin and geographical indications, traditional terms, labelling and presentation of certain wine sector products (ID 345)	13 November 2019	7	22	3
367	India - Electronics and Information Technology Goods (Requirements for Compulsory Registration) Order, 2012 (ID 367)	13 November 2019	8	21	3
393	European Union - Hazard-based approach to plant protection products and setting of import tolerances (ID 393)	13 November 2019	20	20	3

Symbol	Title	Date last raised	Members raising	Frequency raised (1995-2019)	Number of times raised (2019)
428	China - Regulations for the Supervision and Administration of Medical Devices (Order No. 650 of the State Council) (ID 428)	13 November 2019	5	17	3
466	China - Registration Fees for Drugs and Medical Device Products (ID 466)	13 November 2019	4	14	3
489	China - Insurance Regulatory Commission (CIRC) Information and Communication Technology Regulation (ID 489)	13 November 2019	6	13	3
477	China - Interim Measures for Quality Management of Commercial Coal (ID 477)	13 November 2019	2	13	3
494	India - Draft Food Safety and Standards (Alcoholic Beverages Standards) Regulations, 2015 (ID 494)	13 November 2019	12	12	3
502	Indonesia - Halal Product Assurance Law No. 33 of 2014 (ID 502)	13 November 2019	6	12	3
497	Russian Federation - Rules of cement certification (ID 497)	13 November 2019	3	12	3
505	Egypt - Manufacturer Registration System (Decree No. 43/2016 and Decree No. 992/2015) (ID 505)	13 November 2019	14	11	3
509	China - National Standards on Limits of Volatile Organic Compounds for Furniture (ID 509)	13 November 2019	1	11	3
511	The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu - Draft of the Organic Agriculture Act (ID 511)	13 November 2019	1	11	3
516	Ireland - Public Health (Alcohol) Bill 2015 (ID 516)	13 November 2019	7	10	3
526	China - Cybersecurity Law (ID 526)	13 November 2019	8	9	3
524	European Union - Organic production and labelling - Maté (erva-mate) (ID 524)	13 November 2019	1	9	3
539	European Union - Titanium dioxide: Regulation (EC) No 1272/2008 (CLP Regulation), Annex VI, Part 2 (ID 539)	13 November 2019	8	8	3
533	China - Cyberspace Administration of China - Draft implementing measures for the Cybersecurity Review of Network Products and Services (ID 533)	13 November 2019	6	8	3
535	European Union - Regulation (EC) No 1107/2009 - non-renewal of approval of the active substance picoxystrobin (ID 535)	13 November 2019	6	8	3

Symbol	Title	Date last raised	Members raising	Frequency raised (1995-2019)	Number of times raised (2019)
534	China - Draft revised Encryption Law of the People's Republic of China by the Office of State Commercial Cryptography Administration (OSCCA) (ID 534)	13 November 2019	5	8	3
547	China - Certification requirements for processed foods (ID 547)	13 November 2019	9	7	3
549	Viet Nam - Decree on the regulation on conditions for automobiles manufacturing, assembling importing and automotive warranty & maintenance services (ID 549)	13 November 2019	7	7	3
544	Viet Nam - Cybersecurity Measures (ID 544)	13 November 2019	6	7	3
545	China - Catalogue of Solid Wastes Forbidden to Import into China (ID 545)	13 November 2019	6	7	3
546	India - Amended regulation on toy imports (ID 546)	13 November 2019	6	7	3
553	European Union - Amendments to the Directive 2009/28/EC, Renewable Energy Directive (ID 553)	13 November 2019	10	6	3
555	European Union - Application of Regulation No. 1169/2011 and Regulation (EC) No. 1924/2006 as regards the labelling of food products, in not prohibiting or examining the use of "palm oil free" labels (ID 555)	13 November 2019	8	6	3
556	Thailand - New certification requirements under the Thai Ministry of Finance's Ministerial Notification on Importation of Spirits into the Kingdom of Thailand (B.E 2560) (ID 556)	13 November 2019	8	6	3
557	Brazil - Draft Technical Resolution n° 51, 7 April 2017 on labelling of beverages, wine, and grape derivatives (ID 557)	13 November 2019	1	5	3
559	United States - TSA Certification on security screening equipment) (ID 559)	13 November 2019	1	5	3
567	Russian Federation - Federal law No 487-FZ, providing a framework for comprehensive use of special labelling and traceability of goods and Decision No. 792-r specifying the goods to which labelling will apply and the dates of introduction of the mandatory labelling (ID 567)	13 November 2019	2	4	3

Symbol	Title	Date last raised	Members raising	Frequency raised (1995-2019)	Number of times raised (2019)
568	Brazil - Technical Regulation 14, 8 February 2018, to set the additional official identity, quality standards for wine and derivatives of grape and wine products as well as the requirements to be acquainted and Technical Regulation No. 48, 31 August 2018 published in the Official Gazette on 10 September 2018 (ID 568)	13 November 2019	2	4	3
579	European Union - Chlorothalonil (pesticide active substance) (ID 579)	13 November 2019	10	3	3
580	European Union - Transitional periods for MRLs and international consultations (ID 580)	13 November 2019	10	3	3
577	Republic of Korea - Warning statement and graphic health warnings on alcoholic beverages (ID 577)	13 November 2019	6	3	3
578	Uruguay - Labelling of Packaged Food (ID 578)	13 November 2019	5	3	3
576	China - Cosmetics Supervision and Administration Regulation (Draft) (ID 576)	13 November 2019	4	3	3
575	European Union - Draft Commission Regulation laying down eco-design requirements for electronic displays pursuant to Directive 2009/125/EC of the European Parliament and of the Council, amending Commission Regulation (EC) No 1275/2008 and repealing Commission Regulation (EC) 642/2009 (and its accompanying annexes)" (ID 575)	13 November 2019	3	3	3
566	Chile - Public Consultation for draft legislation setting out rules on the preparation, description and labelling of milk products deriving from milk (ID 566)	13 November 2019	3	3	2
583	Kingdom of Saudi Arabia - Technical Regulation for plastic products OXO - biodegradable (ID 583)	13 November 2019	2	3	3
590	Uruguay - Analysis of Imported Products - Resolution of the Board of the National Grape-Growing and Wine Production Institute (INAVI) of 14 February 2019. Resolution of the Board of INAVI postponing implementation until 1 May 2019) - exogenous water in wine (ID 590)	13 November 2019	5	2	2
589	Kingdom of Saudi Arabia - Added Sugar Upper Limit in Some Food Products (ID 589)	13 November 2019	4	2	2

Symbol	Title	Date last raised	Members raising	Frequency raised (1995-2019)	Number of times raised (2019)

E. Overview of new STCs raised in 2019

The following table provides additional detail about the new specific trade concerns raised in 2019.

Members subject to STC	STC title	Stated objective	Product coverage	Members raising concern
Brazil	Brazil - Ministry of Agriculture, Livestock and Food Supply – MAPA Ordinance 79, of 13 May 2019 establishing a public consultation to amend the Technical Regulation 67, 05 November 2018 regarding the procedures and requirements for export and import certification of beverages, fermented acetic, wines and wine and grapes derived products (IMS ID 597)	Prevention of deceptive practices and consumer protection, Protection of Human health or safety, Quality requirements	Beverages, fermented acetic, wines and wine and grapes derived products (HS 20.09; 22.04; 22.05; 22.06; 22.07; 22.08; 22.09)	US
Brazil	Brazil - Ordinance 259, on 27 May 2019, which makes corrections and updates to the Conformity Assessment Requirements for Medical Devices Subject to the Health Surveillance System in Ordinance 54, from 1 February 2016 (IMS ID 604)	Prevention of deceptive practices and consumer protection, Protection of Human health or safety	Medical devices	US
China	China - Cosmetics Supervision and Administration Regulation (Draft) (ID 576)	Consumer information, Labelling, Prevention of deceptive practices and consumer protection, Protection of Human health or safety, Quality requirements	Cosmetics (HS: 33)	EU Japan Korea US
China	China - Regulation on Cosmetic Inspection in Registration and Filing (ID 584)	Protection of Human health or safety	Cosmetics	Japan Korea US
Ecuador	Ecuador - Energy Efficiency Requirements for Clothes Dryers for Domestic Use (IMS ID 599)	Consumer information, Labelling, Prevention of deceptive practices and consumer protection, Protection of the environment	Clothes dryers (HS 84512)	Korea

Members subject to STC	STC title	Stated objective	Product coverage	Members raising concern
European Union	European Union - Chlorothalonil (pesticide active substance) (ID 579)	Protection of Human health or safety, Protection of animal or plant life or health, Protection of the environment	Chlorothalonil	Brazil Canada Colombia Costa Rica Ecuador Guatemala Honduras Panama Paraguay US
European Union	European Union - Commission Delegated Regulation (EU) 2019/945 on Unmanned Aircraft Systems and on Third-country Operators of Unmanned Aircraft Systems (ID 585)	Protection of Human health or safety	Unmanned aircraft	China
European Union	European Union - Concerns on regulations with regard to eco-design requirements for various products in EU (ID 592)	Protection of the environment	Lighting products; light sources; household dishwashers; washing machines and household washer-dryers	China
European Union	European Union - Draft Commission Regulation laying down eco-design requirements for electronic displays pursuant to Directive 2009/125/EC of the European Parliament and of the Council, amending Commission Regulation (EC) No 1275/2008 and repealing Commission Regulation (EC) 642/2009 (and its accompanying annexes) (ID 575)	Protection of the environment	Electronic displays	China Japan US
European Union	European Union - Medical Device Regulation (MDR) and In Vitro Diagnostic Medical Devices Regulation (IVDR) (ID 594)	Protection of Human health or safety	In vitro diagnostic medical devices	Canada US
European Union	European Union - Product Environmental Footprint Category Rules (PEFCR) (ID 591)	Protection of the environment	Intermediate paper products	Indonesia

Members subject to STC	STC title	Stated objective	Product coverage	Members raising concern
European Union	European Union - Regulation of the European Parliament and of the Council on the definition, description, presentation, labelling of spirit drinks, the use of the names of spirit drinks in the presentation and labelling of other foodstuffs, the protection of geographical indications of spirit drinks, the use of ethyl alcohol and distillates of agricultural origin in alcoholic beverages, which repeals Regulation (EC) No. 110/2008 (ID 593)	Not specified	Spirit drinks	Guyana
European Union	European Union - Revised Draft EU Regulation on Ecological Design Requirements for External Power Supply (IMS ID 596)	Protection of the environment	External Power Supplies	China
European Union	European Union - Transitional periods for MRLs and international consultations (ID 580)	Protection of Human health or safety	Pesticides (buprofezin)	Brazil Canada Colombia Costa Rica Ecuador El Salvador Guatemala Panama Paraguay US
Ghana	Ghana - Administrative Process for Homologation of Model of Motor Vehicle and its Variants (IMS ID 600)	Protection of Human health or safety, Protection of the environment	Motor vehicles	US
India	India - Air Conditioner and its related Parts (Quality Control) Order, 2018 (IMS ID 598)	Other, Protection of the environment, Protection of Human health or safety	Room Air Conditioners: Part 2 Split air Conditioners/Room Air Conditioners – Part 1: Unitary Air Conditioners/Packaged Air Conditioners/Hermetic Compressor/Thermostats for use in Refrigerators, Air Conditioners, Water Coolers and Beverage Coolers/Finned Type Heat Exchanger for Room Air Conditioner	Korea
India	India - Moisture content for Cassia Vera (Cinnamomum Burmani) (ID 595)	Protection of Human health or safety	Cassia vera (cinnamomum burmani)	Indonesia

Members subject to STC	STC title	Stated objective	Product coverage	Members raising concern
India	India - Notification of 2018 draft cosmetic rules, amending provisions of the India Drug and Cosmetics Act of 1940 (ID 586)	Protection of Human health or safety	Cosmetics	EU US
India	India - Toys (Quality Control) Order, 2019 (ID 587)	Protection of Human health or safety	Toys	Canada EU US
Israel	Israel - Bill on the Restriction on Advertising and Marketing of Tobacco Products (Amendment No.7, 5778-2018) (ID 573)	Protection of Human health or safety, Prevention of deceptive practices and consumer protection	Tobacco products	Dominican Republic
Jamaica	Jamaica - Regulations Banning Single-Use Plastic Products (ID 581)	Not specified	Plastic packaging materials	Dominican Republic
Korea, Republic of	Republic of Korea - Ballast Water Management Act (IMS ID 606)	Not specified	Ballast water	EU
Korea, Republic of	Republic of Korea - Package Recycle Classification Regulation (ID 588)	Protection of the environment	Packaging	Canada US
Korea, Republic of	Republic of Korea - Regulation on Energy Efficiency Management Equipment (ID 582)	Consumer information, Labelling, Protection of the environment	Clothes washing machines	China
Korea, Republic of	Republic of Korea - Warning statement and graphic health warnings on alcoholic beverages (ID 577)	Protection of Human health or safety	Alcoholic beverages	Australia Canada EU Japan Mexico US
Pakistan	Pakistan - Amendment to Pakistan's Imports and Exports (Control) Act, 1950: Statutory Regulatory Order (SRO) 237 on labelling, shelf-life, and halal certification (IMS ID 607)	Not specified	Food products in general	US
Qatar	Qatar - Ministry of Public Health Circular regarding shelf life for cheese (IMS ID 602)	Protection of Human health or safety	Cheese	US
Saudi Arabia, Kingdom of	Kingdom of Saudi Arabia - Added Sugar Upper Limit in Some Food Products (ID 589)	Consumer information, Labelling	Food products in general	EU Russian Federation Switzerland US

F. Statements on Implementation and Administration of the Agreement under Article 15.2

Article 15.2 of the TBT Agreement provides that:

"Each Member shall, promptly after the date on which the WTO Agreement enters into force for it, inform the Committee of measures in existence or taken to ensure the implementation and administration of this Agreement. Any changes of such measures thereafter shall also be notified to the Committee."

The following table contains a list of Members having submitted a Statement on implementation and administration of the Agreement under Article 15.2 since 1995. To date, a total of 142 Members have submitted at least one such Statement.

PSIB is also the TBT Enquiry and Notification Point of HKC	
	Conformity Assessment https://www.itc.gov.hk/en/quality/hkas/about.htm#	The webpage introduces the accreditation services for laboratories, certification bodies, inspection bodies through three accreditation schemes.	Hong Kong Accreditation Service (HKAS) subsumed within the Innovation and Technology Commission (ITC) under the Innovation and Technology Bureau (ITB) of Hong Kong, China.	

¹⁰ The list of links in the webpage is prepared on best effort basis which implies that it is non-exhaustive. Hong Kong, China's policy is to use international standards as far as possible and align domestic standards with international standards where appropriate. There is no central standards body developing and issuing domestic standards in Hong Kong, China. As a small and externally oriented economy, it is essential that our goods meet the standards of our major overseas markets. Where standards have to be applied in Hong Kong, China for public health, safety or environmental reasons, our regulatory agencies in general adopt international standards or prevailing overseas standards and avoid the position where setting of standards dictates market development or becomes a means of protecting certain sectors of the industry.
